

Talview Secure Browser

Securely Deliver Exams • With Integrity

Talview Secure Browser creates a secure online environment for organizations seeking to **protect their test content and safeguard the integrity of certifications**. Reduce cheating on online vocational and technical certifications by restricting test taker access and functionality, such as screen recording, app switching, and website browsing, during an online exam. With Talview Secure Browser, rest assured that your **online exams are secure, safe, and protected**.

Protect Your Exam IP

When certifications provide potential professional and economic value to test takers, you spend significant time protecting test content. With Talview Secure Browser, disable screen recording and screen shot functionality to secure exam, assessment, and certification content to **minimize IP loss**.

Safeguard Test Integrity

Certification integrity matters for both professionals and organizations. Increase integrity in your vocational and technical certification with secure tools to **prevent unauthorized access** to the test browser, programs, applications, and more. With Talview, **maintain the value and credibility of your certifications**.

Add a Protective Layer to Your Exams

Reducing cheating is a priority. The **Talview Secure Browser easily integrates with** top learning managements and systems (LMS), including test platforms, such as Moodle, ILIAS, OpenOLAT, and Inspira Assessment, via our plug-and-play capabilities to provide an extra layer of security for all your exams.

Multi-Device Support

Today's professional is remote and on the move. Your assessments and certifications should be too. Easily add Talview Secure Browser with any device, such as a desktop or laptop, to **ensure your exams are secure, safe, and protected virtually anywhere**.

Talview has provided a remote proctoring solution that allows IHRP to administer our competency assessments amidst the COVID-19 restrictions. It not only allows candidates to take the assessments safely at their homes but also ensures that test security is not compromised. Even with the easing of the COVID-19 restrictions, we are happy to partner with Talview to continue providing the remote assessment options for our candidates."

Sheryl Chua,
Manager, Product Innovation & Insights, IHRP

Overview of Talview Secure Browser features and functionality

Restrict Browser Functionality and Navigation

Reduce test taker malpractice by limiting web browser functionality and access to only predefined whitelisted websites, resources, and software applications that are necessary for test-taking.

- No browser, tab, or application switching
- Restrict access to messenger apps, stored documents, remote desktop, and screen sharing
- Disable web browser options, such as menu bar, alt-tab to another window
- Remove URL or search field from browser window

Limit Keyboard Functionality

Disable keyboard shortcuts, function keys, and mouse-click functionality like cut-copy-paste, Win, Alt+F4, Alt+F1, Ctrl+P, right-click menu option, etc.

Prevent Screen Recording and Capture

Disable screen recording and browser screenshots from being taken by test-takers once the secure browser is launched.

Plug-and-Play Integration

With a built-in connection to Moodle, ILIAS, OpenOLAT, Inspera Assessment, and other leading platforms, add another layer of protection to all your exams, tests, assessments, and certifications.
