

## 6 Day QuickStart Summary

### Day 1: Strategy

- Introduction and overview of the Cloud Adoption Framework
- Identification of business motivations and outcomes
- Understanding and validation of business justifications
- Identification of the first migration project

### Day 2 : Plan

Develop a cloud adoption, migration, skills development and readiness plan

### Day 3 : Govern

Policy definitions for:

- Cost Management
- Security
- Identity
- Resource Consistency
- Deployment

### Day 4 & 5 : Documentation

Creation of a landing zone, governance blueprint and suggested recommendations

### Day 6 : Summary

- Review findings and best practices with stakeholder
- Transition knowledge to staff members
- Deliver future state Cloud architecture roadmap

CAF QuickStart includes:

- Post QuickStart virtual mentoring
- Infrastructure assessment
- Skills transfer

## Guarantee your cloud migration & adoption

Ensure the success of your platform & application modernisation journey by designing your cloud architecture correctly, from the *beginning*.

### Microsoft Cloud Adoption Framework for Azure

The Cloud provides unprecedented levels of technology scalability, resiliency, reliability and availability to companies. With the cloud, organisations excel at delivering unparalleled levels of service to not only their employees but also to their customers.

It is imperative for companies to develop a concise cloud adoption and migration strategy. According to the [Unisys Cloud Success Barometer](#): "Companies that made cloud core to their business, by integrating an adoption plan into their broader business transformation strategy at the outset, were more than twice as likely to see great or moderate improvements compared to those for which cloud was a minor part of their business strategy."

## Key initiatives

### Features & benefits

- **Phase 1 - Define Strategy:** Documenting the cloud strategy will help business stakeholders and technicians understand the benefits the organization is pursuing by adopting the cloud.
- **Phase 2 - Plan:** Cloud adoption plans convert the aspirational goals of the cloud adoption strategy into action. It will help guide technical efforts, in alignment with the business strategy.
- **Phase 3 - Ready:** Ready establishes a cloud foundation or Adoption Target that can provide hosting for any adoption efforts. This should consist of common denominators across 80–90% of cloud adoption.
- **Phase 4: Govern:** Policy definition ensures consistency across adoption efforts. Alignment to governance/compliance requirements is key to maintain a well-managed cross-cloud environment.
