

A standalone solution to address the various business requirements to host diversified workloads on Azure Stack HCI and extend Azure services capabilities to datacenter, edge locations and remote offices without needing to obtain anything from a third party.

We will analyze the current estate, define the migration strategy & design by retaining the harmony of the running estate with all the integrations. We own the Azure Stack HCI estate and by leveraging the cloud experience we will ensure the smoothen day to day operations for the below mentioned use cases.

- Remote Office & Branch Office
- Virtual Desktop Infrastructure
- High Performance SQL Server
- Integrated Kubernetes
- Trusted Enterprise Virtualization

Our solution tightly equipped with all required tools like, Cloud Counsel for Assessment Services, Cloud Mason for Foundation Services, also it's integrated with industry proven mechanism – “TCS Cloud Experience” for handling the day-to-day operations.

TCS Tools & Accelerators

- App Inventory
- Infra Inventory
- Risk Assessment
- Organization Goals & Migration Principles

- **Assess** the physical & virtual workloads with performance matrix
- Sizing recommendation
- **To-Be Architecture** definition
- Road Map definition

- **Foundation Services** review – Security, Firewall, SIEM, Active Directory, Backup and Restore, Logging and Monitoring.
- **Design** the Hybrid Cloud Network Connectivity.
- **Design** all the integrations required

- **Build** the Azure Stack HCI Env.
- **Integration** with tools like Monitoring, Backup, AV etc.
- **Migration** through Azure Native tools, Azure Copy / Robo Copy or 3rd party tools
- System Testing
- Collaborate with incumbent to perform decommission

- **Target Operating Model** definition
- SLA management
- Cost Optimization
- Monitoring
- Automated Management
- Steady State Support

- **Strategic Partnership with Microsoft Azure:** TCS is an Azure Expert Managed Service Provider, Microsoft Partner Network (MPN) Gold Certified Partner and an active member of the MPN Cloud Solution Provider (CSP) program. Our collaborative partnership with Microsoft helps us create more value for our customers through prioritized technical issue and billing support, access to learning resources and vendor expertise, and regular updates on product roadmap.
- **Faster Time to Value:** Reduce migration assessment time by up to 30% using our proven assessment framework and toolkit. Improve speed to production by understanding server and application interdependencies and achieving an error-free migration.
- **Factory based approach** - scalable team to provide assess, build, transform, and manage services.
