Anunta-AVS

Modernize Your Infrastructure with Azure VMware Solution

Move to the cloud while fully enjoying all the existing benefits of your VMware virtual machines.

Effortless Migration

Migrate existing VMware workloads to the cloud without major reconfiguration.

Reduced Costs

Optimize resource usage and potentially save on licensing fees.

Enhanced Agility

Scale resources up or down quickly to meet business demands.

Improved Security:

Benefit from Microsoft's robust cloud security infrastructure.

Familiar Environment

Manage your VMs with the same VMware tools you already know.

Hybrid Cloud Power

Seamlessly integrate your on-premises environment with Azure services.

Capitalize on AVS Benefits for Your Diverse IT Needs

Scale on Demand:

Flexibly scale data center capacity in Azure to meet changing needs.

Cloud DR:

Set up reliable cloud-based disaster recovery with familiar VMware tools.

Optimize Data Center:

Reduce on-premises footprint with smooth vSphere workload migration.

Modernize Apps Easily:

Leverage Azure services and Tanzu for app modernization without rewrites.

High-Performance VDI:

Deploy secure, scalable VDI solutions using Azure's power.

Azure VMware Solution: The Best of Both Worlds

Seamless Cloud Migration:
Move your existing VMware workloads to Azure's dedicated infrastructure (31 regions globally, including government clouds) without major changes.

Unified Management:
Manage everything from your familiar VMware tools while integrating seamlessly with Azure services through the Azure portal.

Scalability and Cost Savings:
Scale resources up or down on-demand and potentially save on licensing fees with optimized resource usage.

Effortless Portability:
Easily move large workloads between on-premises and Azure environments.

Enhanced Functionality:
Access a wide range of native Azure services and extend your solution with additional options from VMware and its partners.

Customer Impact – AVS

Boosting User Experience and Business Agility

Azure
VMware Solution

- A leading waste management solution is leading in improving environmental impact.

- Anunta deployed Horizon on AVS cluster in distributed architecture. The components were deployed in Azure native and AVS. The NSX-T was integrated to achieve micro segmentation. The solution was design to access Horizon across multiple locations. Anunta migrated their 50+ application servers to AVS cloud using VMware HCX migration tool. Anunta executed a customized solution leveraging Azure Cloud. With best- in-class design tenets, Anunta was able to build a highly resilient and scalable computing platform. Anunta also leveraged its state-of-the-art intelligent operations platform, EuVantage, to monitor application performance and measure application latency.

- A leading healthcare solutions provider wanted to setup a Disaster recovery for their applications and Horizon VDI on Azure VMware Solution to reduce the capex investment and achieve better SLA. They turned to Anunta to migrate their datacenters, applications and Horizon VDI servers to the cloud with cost-effectiveness and regulatory compliance at its center.

- Anunta executed an extensive AVS setup with the client to check the performance and latency of applications, The project was conducted considering AVS as DR site with all applications and data replicated to AVS DR site. Anunta was successfully able to deliver the DR use cases achieving the RPO/RTO as per customer requirement. Horizon VDI with CPA was setup for seamless user switchover to DR site.

- The migration was conducted using HCX migration with L2 extension for 20+ application servers. The engagement helped the customer to achieve Datacenter resiliency with minimum RPO/RTO.

A Leading Global Digital Workspace Solutions Provider

Digital Workspace Solutions

Our Offerings

DaaS/ VDI	Managed Endpoint Services	Cloud Services

Our Platforms

anunta DesktopReady™ — Rapid, comprehensive onboarding and provision of desktops in any configuration.

EuVantage® — Manage end-user performance with in-depth visibility and intelligent correlation.

CloudOptimal™ — Improved control and optimization of cloud infrastructure costs.

- **12+ years** in EUC design, implementation and management
- **US patented AIOps** platform across the spectrum of our offerings
- Advanced automation with high-quality & scalable, and remote delivery structure

Delivery Excellence

250,000+ User Desktops under Active Management	**99.98%** End User Availability	**88** Net Promoter Score	**1,000+** Applications Assessed and Integrated
99.99% Infrastructure Availability	**500+** Line of business handled	**<0.3** Lowest Incident to User Ratio	**120+** Software Professionals

650,000+ Remote Desktop Users Served

Market Leader

Gartner

Anunta's Digital Workspace Solutions

VDI /DaaS

Enterprise DaaS

Enterprise DaaS is a fully managed custom-built DaaS solution that provides on-demand virtual desktops hosted on any public cloud or private on-premises infrastructure using VDI.

Packaged DaaS

Anunta's Packaged DaaS provides secure pre-configured virtual desktops hosted on a public cloud and is easy to deploy and use. Targeted at small and mid-size enterprises.

Managed Endpoint Services

Modern Desktop Management

With a single solution, eliminate your tool sprawl and siloed approach, and collectively enhance your IT management to provide a seamless user experience.

Device Lifecycle Management

Optimize the lifecycle of your devices, from procurement to retirement to deliver cost savings, streamline operations, and ensure security and sustainability.

Mobile Device Management

From device enrollment to security to application management, Anunta helps you take control of your mobile devices and empower a smart and secure workspace.

Secure Access Service Edge

Replace traditional network security measures with our SASE solutions to ensure not just iron-clad security but to enhance performance and scalability.

Cloud Services

Cloud Migration

From seamless data transfer and robust security implementations to efficient workload management, we ensure a smooth transition to the cloud, optimizing performance, scalability, and reliability for your digital infrastructure.

Cloud Management

From efficient workload and network management to robust security, vendor collaboration, and continual service improvement reviews, we tailor solutions to optimize your cloud environment for peak performance and reliability.

Cloud Optimization

From 24/7 infrastructure monitoring to cost transparency and optimization, we provide tailored solutions that streamline operations, enhance security, and maximize efficiency for a resilient and agile digital landscape.
