TBSC Azure Finops offers the Azure Value Improvement service, which helps organizations optimize performance and increase value on Azure by identifying and implementing best practices and optimization strategies.

Azure Cost Health-Check

Azure Services

Azure Cost Health-Check is an in-depth analysis of the current Azure services and how costs can be reduced.

Detailed Analysis of Azure Pricing

Azure Cost Health-Check includes a detailed analysis of Azure pricing for hosting, software, and other aspects to identify areas where cost can be reduced and value can be improved.

Entry-level Service for Opportunity Assessments

Azure Cost Health-Check is a low cost service offered to selected partners and is quick and easy to install.

Cost Reduction Service

Continuous Optimization

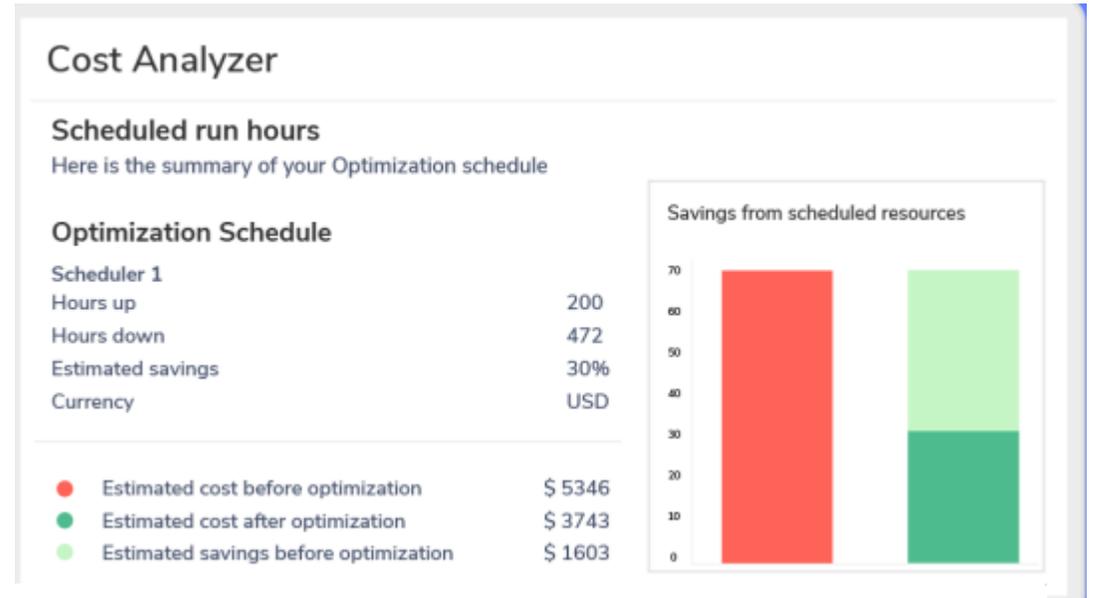

Cost Reduction Service provides ongoing monitoring of Azure usage and continuously checks and optimizes Azure spend to identify areas where cost can be reduced.

Cost Saving Recommendations

Cost Reduction Service makes recommendations for improvement to help organizations save costs and optimize performance over the long term.

Automatic Run with Consultation

Once set up, Azure Cost Health-Check will run automatically with advice from a consultant for the managed services in making the required improvements

Analyze cost spikes across multiple subscriptions

Optimize costs with Rightsizing, Reservations & Schedules

Forecast Azure Spend & Plan the budgets efficiently

Azure Value Improvement Service

Cost Reduction Services

Azure Value Improvement Service provides cost reduction services to optimize Azure hosting services for maximum value. This service can help reduce total Azure costs up to 25%.

Best Performance in Azure

Azure Value Improvement Service shows how the best performance can be achieved in Azure over the year. By optimizing Azure hosting services, it is possible to achieve the best performance possible.

Comprehensive Hosting Services

Azure Value Improvement Service provides comprehensive Azure hosting services that are optimized for maximum value. These services include all the features required for successful hosting on Azure.

For Microsoft Partners

Azure Value Improvement Service is a great way for Microsoft partners to win new clients and ensure customer satisfaction with the advice and service provided on their Azure hosting.

Benefits of TBSC Azure Finops Service

Cost Savings

TBSC Azure Finops Service helps organizations save costs by optimizing Azure hosting services and providing ongoing monitoring, analysis and recommendations to reduce usage costs.

Optimized Performance

TBSC Azure Finops Service optimizes performance for Azure hosting services by providing expert advice and monitoring performance metrics, ensuring organizations get the most out of their Azure investment.

Customer Satisfaction

TBSC Azure Finops Service is a great way for Microsoft partners to win new clients and ensure customers are satisfied with both the advice and managed services provided, helping to build strong, long-term relationships.

Comparison vs Microsoft Azure Cost Manager

Analyze cost based on business dimensions like customers, teams, products, etc.	✓	✗
Spend analysis across multiple Subscriptions and tenants	✓	✗
Compare expenses between two time intervals	✓	✗
Forecast cost trends	✓	✓
Budget based monitoring	✓	✓
Get right-sizing recommendations along with estimated savings	✓	✗
Reservations plan recommendations for compute resources	✓	✗
Auto-scale down resources during non-peak business hours	✓	✗

- A managed service vs utility
- Covers multiple installs
- Splits costs by groups
- Advise on optimization of costs
- Extended facilities
- Best tool for winning new customers
