

The proven solution
for implementing
TeamMate

TeamMate Professional & Technical Services

At TeamMate, we pride ourselves not only on our industry-leading software, but also on our dedicated team of technical and business consultants, all of whom are focused solely on helping you use your TeamMate software most effectively in support of your ongoing business objectives.

The TeamMate consulting team is composed of professionals with all of the expertise necessary for a successful implementation of your TeamMate software.

- Our Professional Services team consists of experts from the Internal Audit and Compliance professions, and many hold certifications in the field, including CIA, CFE, CCSA, and CRMA designations.
- Our Technical Services team consists of technical experts in both cloud-based and on-premise installations, with a reputation for maintaining unparalleled system uptime.

This combination of skills works to ensure that you have a high-performing TeamMate system configured to your specific needs and objectives, wherever and whenever your staff members perform their work.

TeamMate Professional and Technical Services teams will implement your system using our proven project methodology. You will work with a closely-aligned group of our consulting experts who will coordinate with your internal teams to implement a system that not only meets your needs, but does so on time and on budget.

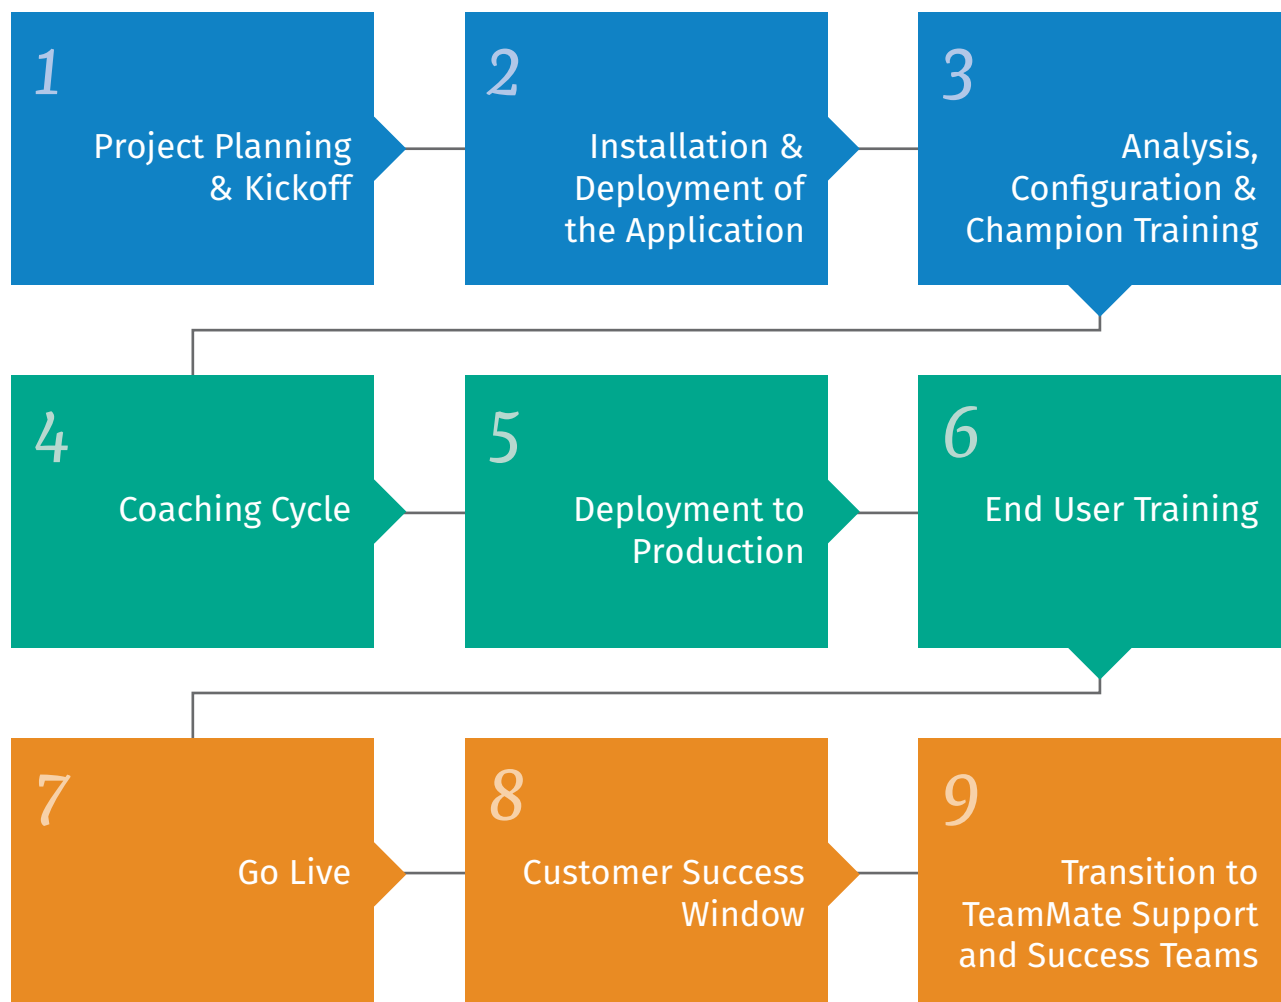

Our Step-by-Step Approach

We believe that developing a solid foundation and working relationship is important during the transition from an existing platform to a new system of integrated electronic audits. We draw on our industry-leading experience at more than 2,700 organizations around the world to ensure a world-class TeamMate implementation.

Our consulting methodology ensures a successful implementation for your organization and creates a sustainable TeamMate user community within your organization. We offer a comprehensive portfolio of consulting, training, coaching and technical services to support our clients through each stage of an implementation and beyond. Based on our analysis of your business requirements and our proposed solution, we have outlined the following services to deliver.

Our model follows a defined methodology, which focuses on meeting your business objectives and ensures your success with the TeamMate software.

Project Methodology

Technical and Consulting Services

In addition to our full, project-based implementation program, TeamMate Professional and Technical Services teams also offer the following consulting services:

Installation and Hosting Services

Our technical team provides complete on-site or hosted installation of the TeamMate Suite or for individual suite components, along with customized one-on-one training for your TeamMate “IT Champion.”

“Trusted Advisor” Coaching Services

Our certified Internal Audit and Compliance experts are unique to the industry, with practical audit and TeamMate experience. They are available at any time to review your TeamMate system and to provide a “best practices” review of your audit processes to ensure you are meeting your team’s goals and objectives.

On-site and Virtual Custom Training Services

Both during your initial implementation and over time (as new staff join your organization, for example), our certified team can provide you with both the end-user and “Champion” training that will help you optimize your efficiencies and practices. We also have “Train-the-Trainer” options for larger organizations, where we equip you with the knowledge and materials you need to roll out your TeamMate solution wherever your internal auditing responsibilities may reside.

Upgrade and Migration Services

Keeping current with our latest versions enables our customers to capitalize on the capabilities, efficiencies, and ongoing functional improvements TeamMate consistently brings to its Audit Management and Compliance Management solutions. Both our Professional and Technical Services teams can assist you in upgrading to our latest version, and in providing training on the incremental changes the newest versions provide.

Custom Reporting Services

Our Professional and Technical Services team can assist you in scoping custom reports, and then either train you on how to build them yourself or build them for you as a custom service. These reports can be specific to your electronic working papers module or can be designed to combine data from a variety of the system’s functional components.

TeamMate University Public Training Courses

TeamMate certified professionals also provide group courses for our software, held around the world, that cover all of the key Champion and end-user capabilities of our flagship audit management software.

TeamMate User Forum

Our annual TeamMate User Forums—held in multiple locations around the world—have become a must-attend event for thousands of TeamMate customers looking to learn about the latest TeamMate has to offer and build their knowledge of existing products and services. With more than 50 sessions covering both industry and technical topics, the User Forums have long been a great place to send staff members eager to learn more and network with other TeamMate users.

Continuing Professional Education (CPE) Credit

As one of the largest providers of Continuing Professional Education (CPE) Credits in the audit world, TeamMate Professional and Technical Services offerings help you and your staff maintain your own vital credentials. Participants in our sessions earn these credits while attending any of our consulting or training sessions, with one credit earned for each consulting or training hour completed.

Wolters Kluwer (TeamMate) is registered with the National Association of State Boards of Accountancy (NASBA) as a sponsor of Continuing Professional Education on the National Registry of CPE Sponsors. State boards of Accountancy have final authority on the acceptance of individual courses for CPE credit. Complaints regarding registered sponsors may be addressed to the National Registry of CPE Sponsors, 150 Fourth Avenue North, Nashville, TN, 37219-2417.
