

Intune Optimization & Advisory Services

Overview

Transform your Microsoft Intune into a secure, scalable powerhouse. We validate and optimize Intune and Entra ID across Windows, iOS/iPadOS, macOS, and Android; fine-tuning compliance, configuration, endpoint security, apps, Autopilot, Defender for Endpoint, and Cloud Kerberos Trust. Rapidly achieve cloud-first readiness through collaborative sessions. Ideal for organizations focused on compliance, security, and operational excellence.

Key Benefits

Unified Security: Manage all devices via Intune & Entra ID

Rapid Setup: Fine-tune compliance, Autopilot, Defender & more in collaborative sessions

Compliance Ready: Align to Microsoft best practices for risk reduction

Scalable Growth: Cloud-first for BYOD & hybrid environments

Efficiency Gains: Cut IT costs, boost productivity & enable ongoing optimization

Project Activities & Deliverables

- **Validate and optimize** Microsoft Intune and Entra ID for device, app, and policy management across Windows, iOS/iPadOS, macOS, and Android platforms
- **Fine-tune key components** including compliance, configuration, endpoint security, application deployment, Autopilot (if required), Defender for Endpoint, and Cloud Kerberos Trust
- **Provide collaborative deployment sessions** to ensure operational readiness and visibility into the configuration process
- **Four (4) hours of remote administrator support** during the first thirty (30) days after deployment
- **Live, recorded knowledge-transfer sessions** with the customer. delivered upon completion

Project Timeline

1 Project Initiation

- Conduct project kick-off meeting
 - Introduction
 - Project overview
 - Review activities
 - Key assumptions & out of scope
 - Review project requirements
 - Define success
- Perform project planning & scheduling activities

2 Customizations

- Tenant-specific policies
- RBAC
- Fine-tuning
 - Deployment validation & optimization
 - Policy review
 - Update rings validation & optimization

3 Best Practices

- Baseline configurations and alignments
- Documentation

4 Post-Delivery Review & Optimization

- Conduct a post-delivery review meeting to evaluate project outcomes against objectives & success criteria
- Gather feedback to inform continuous improvement & strengthen collaboration
- Fine-tuning/feature enhancements recommendations based on operational feedback

Take your organization to the next level through secure, cloud-first, remote-first Microsoft solutions with Team Venti
