Improve Your Security Posture with a Threat Protection Envisioning Workshop

We can help you develop a strategic plan customized for your organization and based on the recommendations of Microsoft experts in security. You'll gain visibility into immediate threats across email, identity, and data, plus clarity and support on how to remediate vulnerabilities and upgrade your security posture for the long term.

By Attending this engagement, you can:

Identify current, ongoing security threats and discover vulnerabilities in your environment

Document your security strategy for the benefit of key stakeholders

Better understand how to accelerate your security journey using the latest Microsoft Security tools

Walk away with actionable next steps based on your specific needs and objectives

What we'll do during the engagement

Analyze

Analyze requirements and priorities for a Unified Security Operations Platform with Microsoft Defender XDR and Microsoft Sentinel.

Define scope & deploy

Define scope & deploy selected Microsoft security solutions in the production environment.

Discover threats

Discover threats to cloud and on-premises and across email, identity, servers, endpoints and data.

Discover and prioritize vulnerabilities

Discover and prioritize vulnerabilities and misconfigurations across the organization.

Plan

Plan next steps on how to work together.

WHAT TO EXPECT

+ Analysis of cybersecurity threats that are found targeting your organization.

+ Actionable recommendations to help immediately mitigate the identified threats and discovered vulnerabilities.

+ Visibility into vulnerabilities to your Microsoft 365 cloud and on-premises environments to better understand, prioritize and address vulnerabilities and misconfigurations across your organization.

+ Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps.

+ Modular approach, allowing you to select three (3) out of six (6) available modules aligned to your needs and requirements.

Who Should Attend

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- IT Security Architects
- IT Security Administrators
- IT Security Operations (Sec Ops)
