

# Learn how to put next-generation Microsoft Security tools to work for you.

## Engagement highlights

Review your security goals and objectives

Identify real threats and discover vulnerabilities in your environment

Map identified threats and vulnerabilities to specific solution recommendations

Develop joint plans and next steps

Do you know how many phishing attacks your organization has received? If employees are using the right password protocol? Whether personal data is being exposed? In short, is your organization's cloud environment as secure as you think it is?

## Improve your security posture with a Threat Protection Envisioning Workshop

Organizations today are managing a growing volume of data and alerts while dealing with tight budgets and vulnerable legacy systems. Get help achieving your broader security objectives—and identify current and real threats—by scheduling a Threat Protection Engagement.

We can help you develop a strategic plan customized for your organization and based on the recommendations of Microsoft experts in security. You'll gain visibility into immediate threats across email, identity, and data, plus clarity and support on how to remediate vulnerabilities and upgrade your security posture for the long term.

## Why you should attend

Given the volume and complexity of identities, data, applications, devices, and infrastructure, it's essential to learn how secure your organization is right now, and how to mitigate and protect against threats moving forward. By attending this engagement, you can:

Identify current, ongoing security threats and discover vulnerabilities in your environment

Walk away with actionable next steps based on your specific needs and objectives

Document your security strategy for the benefit of key stakeholders

Better understand how to accelerate your security journey using the latest Microsoft Security tools

## What to expect:

During this engagement, we'll partner with you to strengthen your organization's approach to cybersecurity. We'll help you better understand how to prioritize and mitigate potential attacks, with:

- Analysis of cybersecurity threats that are found targeting your organization.
- Actionable recommendations to help immediately mitigate the identified threats and discovered vulnerabilities.
- Visibility into vulnerabilities to your Microsoft 365 cloud and on-premises environments to better understand, prioritize and address vulnerabilities and misconfigurations across your organization.
- Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps.

## Who should attend

The engagement is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- IT Security Architects
- IT Security Administrators
- IT Security Operations (Sec Ops)

## Why Tech Heads?

**We provide **secure** IT infrastructure & operations to midsize organizations everywhere.**

Tech Heads is a full-service IT consultancy offering expertise in all areas of digital transformation from Cloud to Networking to Datacenter design. We also offer a suite of security-first Managed IT Services based on the framework of the CIS 20 Controls to help alleviate the cost of complexity of IT and cybersecurity operations. And finally, we partner with the best vendors in the industry to procure cutting edge IT solutions.

For some IT consultancies security is an afterthought, something to be added on. But at Tech Heads cybersecurity is integrated into every solution we provide.
