

Document amplifAler

Structure, manage, and get meaningful insights from documents with Generative AI

Overview & Challenges

In our increasingly digitalized world, documents remain essential for various reasons such as regulatory compliance, legal requirements, ease of use, templated information capture, physical evidence, and audit needs. However, interpreting or extracting information from these documents still requires human intervention, as current technology struggles to comprehend specific content effectively. Additionally, the complex structure of document content further complicates the extraction of accurate data points.

Various challenges persist that can hinder accurate information extraction from document, including:

- Numerous content structures
- Document quality
- Lack of corroboratory context
- Huge volume of archived documents
- Multilingual complexities
- Domain context challenges
- Uncontrolled template variations

Industry Applicability

Implementing information sorting and extraction for documents has significant efficiency and cost impact across nearly all business functions in an enterprise:

Client on-boarding

Supply chain lifecycle

Legal and contracts

CRM functions

Back-office operations

Billing and invoicing

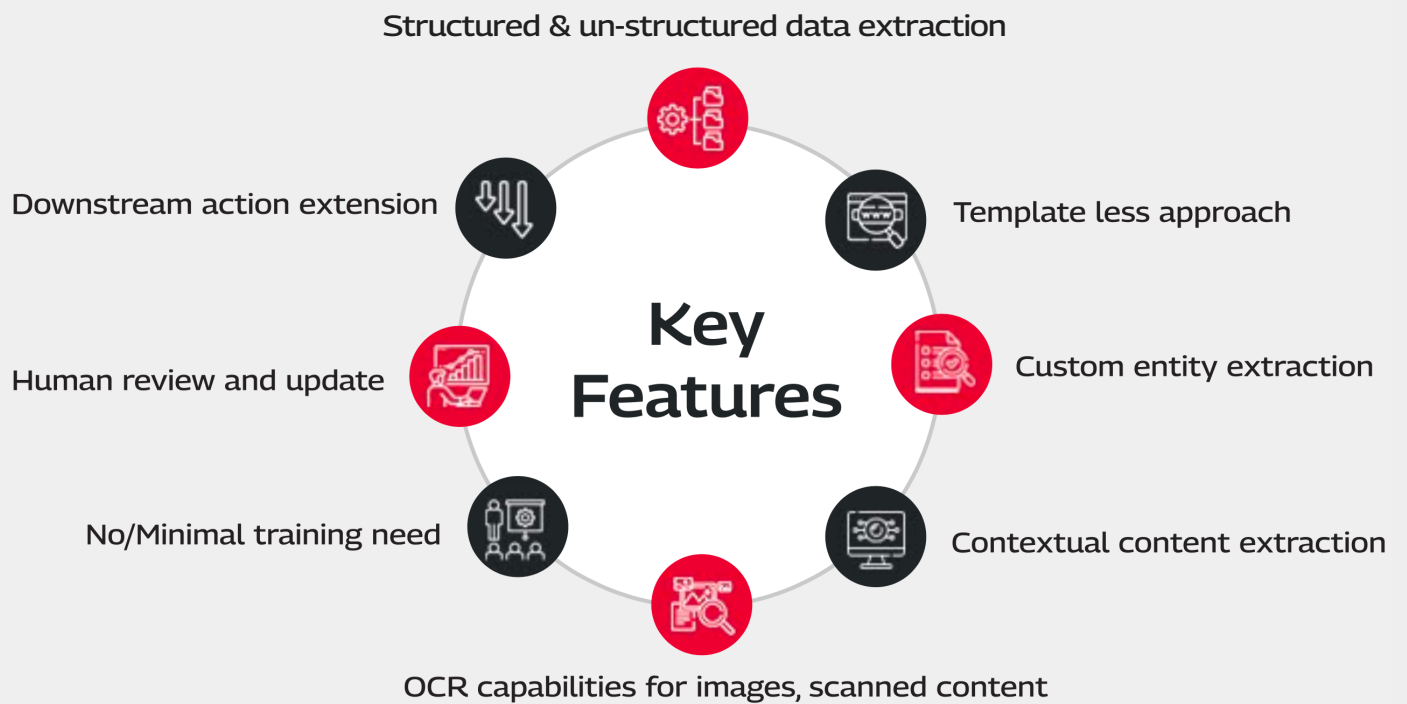

Regulatory compliance

Our Solution

TechM's Document amplifAler helps enterprises mine the treasure of information from all forms of documents and enables it for downstream automation. Embedded generative AI features make the solution generic, flexible, contextual, and effortless in terms of adoption. This workbench ingests documents with minimal or no training and extraction. It also seamlessly orchestrates human review and downstream action.

Key Features:

Benefits

Such document processing has the potential to gain 30-50% time and cost efficiency, including other soft benefits:

Operational responsiveness and agility

Delightful customer experience

Digitized processing in the true sense

Manual error reduction

Labor cost reduction
