HealthNxt

Healthcare Delivery Platform
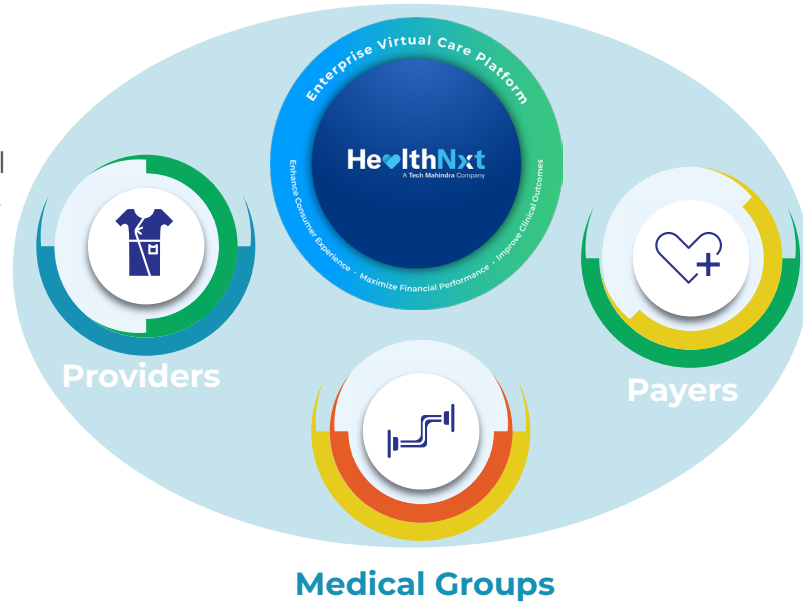

Digitally Extending Care

HealthNxt

OUR COMPANY

HealthNxt is a cutting-edge healthcare platform that streamlines operations and improves patient engagement. It's a digital ecosystem that seamlessly integrates various healthcare functions and services through APIs. These APIs facilitate efficient data exchange, interoperability, and integration with external systems and vendors. HealthNxt empowers healthcare providers to access top-notch industry solutions and services, enhancing operational efficiency, patient experiences, and member-centric care in a technologically advanced setting. Its API-driven approach ensures scalability, flexibility, and innovation, enabling digital healthcare providers to adapt to a rapidly changing technological landscape.

OUR MISSION

HealthNxt's mission is to improve the virtual care experience across the healthcare spectrum. To this end our platform, services and solutions are ideated and designed to solve for strategic imperatives for payers, providers and medical groups. Our full solution provides not only the platform and APIs for connectivity but also the single-entry point experience, both web and mobile.
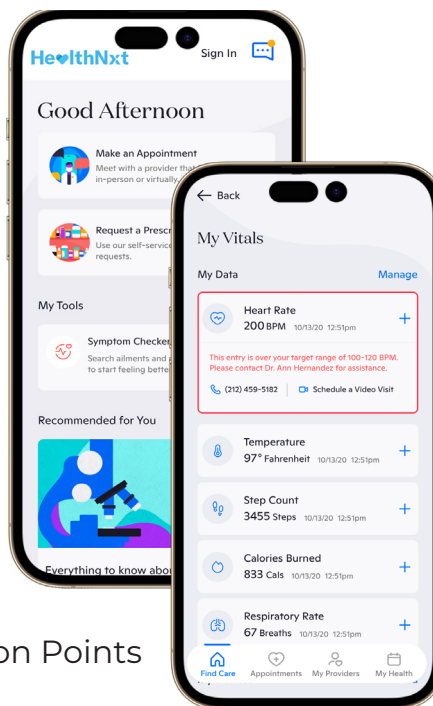

Providers

Payers

Medical Groups

OUR SOLUTION

The HealthNxt solution improves the experience through our enhance-and-extend philosophy by integrating:

End to end integration of digital care

Enhanced Consumer Journey

Patient Initiated Functionality

Aggregate populations

Payer Integration

Care Coordination

Provider Initiated Connectivity

Empower Patients pursuit of health

Eliminate Fragmentation and Friction Points

Integrated Application Examples

- EMR / Health Records
- Telehealth
- Hospital at Home / RPM
- Integrated Care Pathways
- Secure Communications
- Symptom Checker
- Find-a-Doc
- Scheduling
- Check-In / Registration
- Billing
- Wellness / Lifestyle
- Pharmacy / Medication Adherence
- Emergency / Urgent Care
- Maps / Wayfinding
- Digital Assistant

VALUE

HealthNxt is a human-centered technology platform for health systems providers and payers that eases the burden of optimizing application integration to enable the virtual care journey for consumers through an elegant user interface.

GROWTH

Enterprise virtual care platform driving new patient engagement, personalized content (e.g. geolocation, condition) and a branded experience.

CONVENIENCE

Our platform offers a unified, self-service patient journey with a human-centered design, robust integration, and interoperability. We provide configuration tools for client self-service, optimized clinical workflows, and a modular, open architecture.

OUTCOMES

We enhance healthcare by prioritizing patient experience, integrating remote patient monitoring, optimizing efficiency, and reducing costs and care leakage.

USE CASES

Use cases	Low — PERSONALIZATION / CENTRICITY SCALE — High			Expected Benefits
	API Connectors	Accelerator	Platform	
Enable consolidation of multiple billing channels	Bill Pay Connector and Billing Pathway tools for connectivity issues and sharing data across platforms	LoyaltyNxt — Streamlined billing interactions making it easier for patients to interact with payments	Single Pane of Glass; unified payment interactions for the entire patient journey	Increased payment capture and reducing staff burden for manual revenue capture.
Bridge connections between multiple Pharmacy vendor solutions otherwise difficult to connect	Pharmacy Connectors for ancillary pharmacy systems to EMR and other relevant systems	LoyaltyNxt — Increased ease of use for prescription and pharmacy needs	Single Pane of Glass; unified medication management experience throughout patient journey	Patient satisfaction and increased medication adherence, reduced risk of readmission
Enable curated search criteria for providers and locations, simplified search terminology	Scheduling Connectors connect provider and location databases to consolidate data	AccessNxt — Enables streamlined provider and location searching functionality	Single Pane of Glass; unified search experience across patient journey	Elevated search experience and consolidated data increase ability for current and potential patients to find what they are looking for, increasing utilization of services
Connect to patients across communication platforms	SMS / Email Authentication and communication vendor connectors	AccessNxt — Streamlined communication engagement	Single Pane of Glass; unified communication platform for all patient interactions	Increased patient engagement, reduction on staff burden and increased patient satisfaction, reduction in readmission
Enable contact free check-in of patients	Access and registration connectors and integration to custom forms	AccessNxt — enables personalized care and mgmt. experience	Single Pane of Glass; seamless check in process across all patient interactions	Higher/better data capture and reducing staff burden for manual data entry

BENEFIT TO Azure

The ability to collectively develop healthcare tools on the Azure platform serving a rising market and delivering an innovate user experience for payer, provider, and medical groups.
