

Reimagine productivity with Microsoft Dynamics

Transform business process automation and people productivity with Microsoft Dynamics and the Microsoft Cloud

Improve Productivity

Go beyond your stand-alone applications with connected solutions that drive business process automation and employee productivity

Dynamics ERP

Gain Insights

Harness the power of data to improve processes, spot trends faster and outperform your competitors

Dynamics CRM

Microsoft Dynamics, Microsoft Cloud for Manufacturing & Distribution

Reduce IT dependencies

With software / apps running in the cloud, you can manage customers, financial data and stay focused on your core business without the need of wait on IT

Office 365

Run your business and delight your customers with the tools you need to increase insight, grow sales, manage your financials, and stay compliant. Microsoft Dynamics customer relationship management (CRM) and enterprise resource planning (ERP) solutions go beyond simple integration with Microsoft productivity tools like Outlook, Word, and Excel. With a single sign-on you can access your business applications from within Office and share data across solutions, making your tasks easier and your people more productive.

With Microsoft Dynamics and the Microsoft Cloud, you're free to work anywhere, anytime, across your devices. It's quick to deploy, easy to use, and has the power to support your growth ambitions. Start with what you need today and easily adapt as your needs change.

- **Financial management and accounting** Manage cash, assets, and banking.
- **Supply chain, Manufacturing, and Operations** Track and manage production, inventory, orders, and vendors.
- **Marketing, sales, and service** Manage campaigns, sales opportunities, contacts, and service contracts.
- **Project management** Create estimates, track projects, and manage capacity.
- **Business intelligence and reporting** Get real-time visibility and analytics to track performance and to act with insight.
- **Multi-currency.** Compete globally with multi-currency and language capabilities.

Rochelle Park, NJ 07662

By connecting processes, information, and individuals across functions, plants, companies and geographic locations, ERP solutions amplify enterprise-wide communication and coordination in real-time and with increased precision. Furthermore, specific to manufacturing, organizations can reap rewards in terms of:

- 1. Rapid response times**—crucial for those last-minute requests, rush orders, status updates
- 2. Improved on-time delivery** to boost customer experiences, customer satisfaction
- 3. Better resource management**—which greatly impacts planning, management decision-making & production
- 4. Improved interaction with customers and suppliers**—again, this drives increased retention rates.

Microsoft Azure is changing manufacturing

As an industry-leading cloud platform, Microsoft Azure has been at the center of this transformation, helping manufacturers construct scalable digital infrastructures, adopt effective productivity tools and prepare for developing technological shifts. There's never been a better time for SMBs to modernize their technology. The cloud has opened up new avenues for companies of all sizes to expand capabilities, create greater productivity and mobility, and efficiently expand their growing businesses. Companies looking to move to the cloud need to understand what options will best suit their business needs today and support where they want to go tomorrow..

Grow Efficiently

Use flexible, agile, simplified IT

- ✓ Automate and easily adapt business processes.
- ✓ Manage your business, not your servers.

Work Smarter

Make informed decisions

- ✓ Manage opportunities and increase sales.
- ✓ Get a 360-degree customer view.

Modernize Business

Connect and collaborate from virtually anywhere

- ✓ Bring your office with you wherever you go.
- ✓ Respond at the speed of business

Why do businesses move to the cloud?

Frees up IT resources to work more on strategic tasks

Increases productivity outside the office

A source of competitive advantage for early adopters
