

# Microsoft Intune: Custom Deployment

## Engagement Results

-  Improve your Secure Score with Microsoft Endpoint Manager
-  Deploy management policies that protect your users, company data, and devices
-  Monitor and control your users' endpoints and their compliance with your IT policies
-  Determine the best way to give your users access to the apps they need on the devices of their choosing

“Modern device management encompasses a wide range of areas including user protection, adding/removing devices, managed applications, end user support, and rolling out new capabilities.”

-Forrester\*

How are you managing your mobile devices, laptops, and other user endpoints? Do you know if your user's devices are compliant with your IT policies?

**Enable users to be productive, on any device, without compromising IT security**

Take control of your Microsoft Intune experience with a custom deployment tailored entirely to your vision. For those who want Intune their way, we craft solutions that align perfectly with your business goals, workflows, and preferences. Whether it's unique configurations, personalized policies, or seamless integrations, our bespoke approach ensures Intune works for you—not the other way around. Experience the freedom of a deployment process that prioritizes your individuality and delivers a solution that's as dynamic as your organization.

## Why you should use our Custom Intune Deployment

Embrace the future of seamless device management with a custom Microsoft Intune deployment. By deploying Intune, you'll gain unparalleled control over your organization's devices, ensuring they're secure, compliant, and ready to support your unique business needs. Our tailored approach means that Intune works the way you want, because that's what you deserve.

**Learn** how to improve your management capabilities with Microsoft Endpoint Manager.

**Discover & Protect** your endpoints by enforcing policies and deploying security tools.

**Secure** users' identities with multi-factor authentication & conditional access from any device.

**Enable** your users to be productive with the applications they need, on the devices they want.

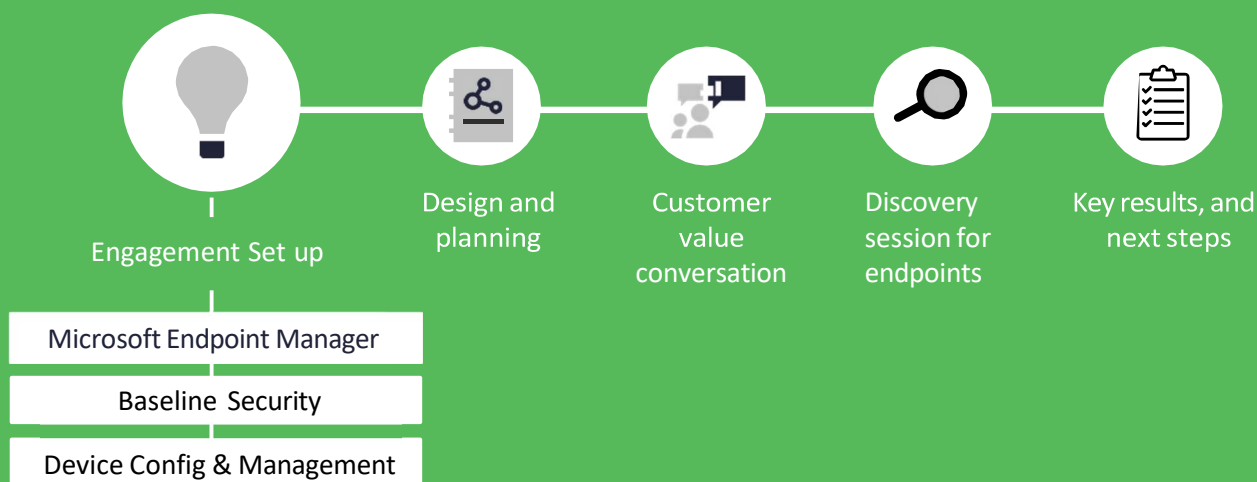

## What to expect
