

Provide mission-critical advanced endpoint management and security capabilities with

Microsoft Intune Suite Pilot

TechNet UC

Intune Suite Tools

 Cloud PKI is a cloud-based service that simplifies and automates certificate lifecycle management for Intune-managed devices

 Advanced Analytics is a set of analytics-driven capabilities that help IT admins understand, anticipate, and improve the end-user experience.

 Enterprise Application Management provides an Enterprise App Catalog of Win32 applications that are easily accessible in Intune

 Remote Help is a cloud-based solution for secure help desk connections with role-based access controls.

“With what we get out of Intune Suite, we can eliminate other products that our customers need. It’s now a suite of many components that enable customers who want to consolidate solutions and save money.”

-Mattias Melkersen Kalvag, Mobility and Windows Management Consultant at MINDCORE, and Microsoft Certified Professional & MVP

Unlock the full potential of your workforce with the Microsoft Intune Suite

Empower your users with advanced Intune features designed to enhance productivity and streamline workflows, all while maintaining the highest standards of IT security. With seamless device management, robust data protection, and intuitive user experiences, your team can work smarter and more efficiently, no matter where they are. Join the Microsoft Intune Suite Pilot today and take the first step towards a more productive and secure future.

Why you should deploy Intune Suite

Our Intune Suite deployment services offer a comprehensive solution for managing and securing endpoints in modern workplaces. By unifying advanced endpoint management and security solutions into one bundle, it simplifies the management experience for IT teams and enhances security. By deploying, you can:

Support zero-trust security by allowing users to run tasks with least privilege

Utilize data science and AI to help IT admins understand, anticipate, and improve the end-user experience

Provide an Enterprise App Catalog for easy access and management of Win32 applications

Implement a cloud-based solution for secure help desk connections with role-based access controls

What to expect

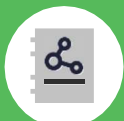

TechNet UC provides a comprehensive implementation service, covering all aspects of the Intune Suite deployment. From initial planning and configuration to testing and optimization, our team of experts will ensure a smooth and efficient deployment process. We'll work with you to:

- Improve your management capabilities with Microsoft Intune Suite
- Discover & Protect your endpoints by deploying security tools
- Secure your identities with Endpoint Privilege Management and Microsoft Tunnel for Mobile App Management
