

Unlock Cloud Benefits. Modernize Device Management

Intune Readiness Assessment

TechNet UC

What You'll Gain

-  A comprehensive assessment of your existing endpoint management
-  Guidance on achieving a secure, compliant, and reliable endpoint environment
-  Counseling for a seamless transition from legacy or unmanaged devices to Intune
-  Actionable insights into device usage, security, and compliance

Modern device management with Intune empowers organizations to protect users, manage devices and applications, and roll out new capabilities efficiently. A readiness assessment ensures you're set up for success, with a clear roadmap and minimized risk.

By preparing for Intune deployment, organizations can eliminate legacy infrastructure limitations, reduce maintenance overhead, and unlock advanced security, compliance, and scalability features available in the cloud.

The Foundation of Modern Endpoint Management

Intune enables advanced features for security, compliance, and collaboration. TechNet UC's readiness assessment ensures your organization transitions smoothly, with minimal disruption and maximum benefit. Our experts assess your environment, identify gaps, and provide operational guidance so you can leverage the full power of Microsoft 365 and Intune.

By moving to cloud-based management, you'll empower your teams with anywhere access, improved reliability, and integrated security controls.

Why Prepare for Intune?

Preparing for Intune deployment enables organizations to modernize endpoint management, enhance security and compliance, and simplify administration. You gain seamless integration with Microsoft 365 apps, automated updates, and improved reliability—while reducing maintenance and operational costs.

Review your current device management environment

Assess technical prerequisites and identify gaps

Recommend policies, configurations, and settings

Explain available new features and processes

What to expect

When you engage TechNet UC for an Intune Readiness Assessment, you'll receive a comprehensive, hands-on service designed to maximize the value of your cloud device management platform. Our experts work closely with your team to ensure a smooth transition, secure integration, and effective knowledge transfer..

We'll work with you to:

- Assess your current device management environment and requirements
- Evaluate security, compliance, and identity configurations
- Deliver actionable recommendations and a technical roadmap
- Provide documentation, operational guidance, and a knowledge transfer session
