

Unlock Cloud Benefits. Modernize Content Management.

# SharePoint/OneDrive Assessment

TechNet UC

## What You'll Gain

Operational readiness playbooks for cloud-based collaboration

Roadmap to a secure, compliant, and reliable SharePoint environment

Direction for a seamless transition from legacy file shares or on-prem SharePoint

Actionable insights into content usage, security, and compliance

Modern content management with SharePoint and OneDrive empowers organizations to protect information, enable secure collaboration, and roll out new capabilities efficiently. A readiness assessment ensures you're set up for success.

By preparing for SharePoint/OneDrive modernization, organizations can eliminate legacy infrastructure limitations, reduce maintenance overhead, and unlock advanced security, compliance, and scalability features available in the cloud.

## The Foundation of Modern Collaboration

SharePoint and OneDrive enable advanced features for security, compliance, and teamwork. TechNet UC's architecture assessment ensures your organization transitions smoothly, with minimal disruption and maximum benefit. Our experts assess your environment, identify gaps, and provide operational guidance so you can leverage the full power of Microsoft 365 for content management and collaboration.

By moving to cloud-based platforms, you'll empower your teams with anywhere access, improved reliability, and integrated security controls.

## Why Prepare for SharePoint/OneDrive?

Preparing for SharePoint/OneDrive modernization enables organizations to transform how they manage and collaborate on content. A proactive approach simplifies integration with other Microsoft apps, reduces operational costs, and empowers your teams with reliable, scalable, and secure access to information—anywhere, anytime.

**Review** your current file-sharing environment

**Assess** technical prerequisites and identify gaps

**Recommend** policies, configurations, and settings

**Explain** available new features and processes

## What to expect

When you engage TechNet UC for a SharePoint/OneDrive Architecture Assessment, you'll receive a comprehensive, hands-on service designed to maximize the value of your cloud content management platform. Our experts work closely with your team to ensure a smooth transition, secure integration, and effective knowledge transfer.

We'll work with you to:

- Assess your current SharePoint/OneDrive environment and requirements
- Evaluate security, compliance, and identity configurations
- Deliver actionable recommendations and a technical roadmap
- Provide documentation, operational guidance, and a knowledge transfer session

### Benefits of Migrating to SharePoint/OneDrive Online

#### Anywhere Access

Access your files from any location

#### Simplified Collaboration

Easily share and work on documents together

#### Improved Security

Keep your data safe with enhanced protection

#### Cost Savings

Reduce IT costs and infrastructure expenses

## Who should be interested

The engagement is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Endpoint & Device Management owners/decision makers
- Application business owners
- IT Security
- IT Operations
- Security Architect
- Security Engineers
