AS MICROSOFT GOLD PARTNERS, WE HAVE A LOT TO OFFER

When we say 'beyond the expected' we mean it. That is why we have expanded our Professional Services offerings by participating in the Microsoft Partner Network. More specifically, we have been recognized as Gold Partners in the competencies of Cloud Platform, Application Integration, and Data Analytics. Our collective knowledge does not end there, as we are also Silver Partners for the Data Platform, Security, Application Development, and Data Center competencies. In other words, regardless of what cloud stage your organization finds itself, Brooksource has the certified expertise to grow both your team and your environment.

CLOUD PLATFORM

Cloud-based solutions are the future and thus the need to transform your organization and modernize to meet customer demands continues to grow.

Migrations	**Refactoring**
Modernization	**Adoption**
Hosting Application	**Utilization**

APPLICATION INTEGRATION

Whether it be through M&A or the continuation of building native apps, your environment will need to be agile and have a way to integrate applications at a rapid pace.

Support Integration Patters	**Rapid Application Integration**
Automation	
Enable Real-Time Analytics	**API Management**

DATA PLATFORM & DATA CENTER

As data becomes your organization's top asset, so does the need to ensure its security, accessibility, and utilization.

Security	**Sql Server**
Dashboard Creation	**On-Prem to Cloud Migrations**
Synapse Analytics, Data Lake, Data Factory, and Databricks	**Hybrid Environments**

DATA ANALYTICS

Data is more than just storage, how you visualize and service your customers will determine the effectiveness of your business.

Security	**AI/ML**
Data Visualization	**Data Storytelling**
Power BI (Business Intelligence)	

SECURITY

Bad actors are no longer an uncertainty in today's connected age. We keep up with the best and latest tools on the market to help you minimize these evolving threats and ensure your environment is protected.

Threat Protection	**Azure Active Directory**
Firewall	**Information Protection**
Azure Security Center	**WAF Application Gateway**

APPLICATION DEVELOPMENT

As the demands from your customers evolve, so should the capabilities of your applications. The ability to design, develop, and monitor is essential to keeping up with these trends.

Azure Application Development	**Universal Windows Platform**
Web and Mobile Client Application Development	**Business Applications**
