

DELIVERED! PRICING FOR A GROWING DISTRIBUTOR

The Retro Stop is a growing distributor of stylish retro puzzles, games and gifts. They operate from 1 location in the UK with their own on-site warehouse.

They sell their products via 2 major retailers using EDI as well as through independent UK gift and toy stores via an online store.

DELIVERED!

Replacing disparate business systems

The Retro Shop's combination of entry-level accounting software, siloed data in Excel spreadsheets and manual, paper-based process just isn't cutting it anymore.

Out of date stock availability is hammering warehouse productivity and deliveries. Costs are rising and poor customer service is starting to affect sales. Something needs to change!

Digital transformation can unlock significant improvements in the supply chain ¹

	Functional Excellence	Digital Supply Chain & Functional Excellence
Lost sales & service	↓ 50%	↓ 65-70%
Transport & warehousing costs	↓ 10-15%	↓ 15-30%
Administrative costs	↓ 5-10%	↓ 50-80%
Capital investment in stock	↓ 20-50%	↓ 35-75%

A SINGLE, COMPREHENSIVE BUSINESS SOLUTION

for distributors and wholesaler alike

A powerful business solution in the cloud for fixed price

Purchasing ERP business software for the first time, the team at The Retro Shop are looking for certainty and don't want to run the risk of any project going over-budget or being delivered late! They want a proven solution, that's delivered in the cloud (as they don't have their own IT team), for a fixed price and fixed scope.

Dynamics 365 Business Central from Tecman, using the Delivered! implementation methodology seems to fit the bill. So what's it going to cost and how long will it take to implement?

Implemented using Delivered!

FIXED TIME
