User Microsoft PowerApps to build custom business applications

About TechnomaX

TechnomaX, an Associate member as well as Gold in Microsoft content and collaboration services had helped clients adopt Power platform technologies from the early stages of inception. TechnomaX will assist your organization in solving the business process requirement leveraging the Power platform to enhance the effectiveness and efficiency of your team. We help in the business applications you need by building the PowerApps. We could help to resolve your pain areas or streamline to automate your process and deliver the same as a project. Content & Collaboration being our core focus, we can help to integrate the PowerApps with SharePoint or Power platforms or the Microsoft stack.

Benefits

Modernize your process and solve the business challenges using Power Apps. The benefits of using PowerApps

- Build custom made apps
- Low cost
- Business Friendly
- Mobile first
- Quick development & Unlock your data

Modernize your legacy applications

The easiest way to modernize your legacy applications for the front line team is PowerAPPS. Either you want to automate your manual process or extend your legacy application services, TechnomaX's expert team of consultants can help. We would structure and build modern cloud apps using PowerApps, PowerAutomate & SharePoint.

362%

70%

Reduction in app development costs

15%

Average improvement in business process efficiencies in year three

The Total Economic Impact™ of Power Apps and Power Automate, a commissioned study conducted by Forrester Consulting, October 2019.

Infopath or excel to PowerApps

Excel or Infopath were always used as the information capture forms. With the unique strength of SharePoint, and the hurdles in Infopath or excel, PowerApps becomes the best solution. We can help to create custom solutions having the inherent strengths of SharePoint Online & at the same time benefit the business users in their productivity using PowerApps, the low-code quick rollout application.

Realize value from your data

TechnomaX can help your organization in building the PowerApps. Our capabilities covers the complete PowerApps platform
