

Let TechPath help you find the path to business and technology alignment

## 1. Business Discussion

Meeting with key team members to gain understanding and provide insights to:

- Business direction
- Technology roadblocks
- Challenges relating to digital transformation
- Desired outcomes

## 2. Technology Review

TechPath conduct thorough review of:

- User experience
- Business applications
- Cloud security
- On-premises security
- On-premises infrastructure
- Internet and communications
- User devices
- Business IT policies

## 3. Solution Strategy

Internal TechPath meeting to discuss findings and propose strategies aligned with business direction and objectives

## 4. Report & Solution Design

TechPath compile a detailed report and solution document. For complex situations or where multiple options are available an additional meeting may be scheduled to determine the best solution moving forward

## 5. Presentation & Approval

Presentation and discussion of report and solution strategy

## 6. Logistics & Implementation

A final meeting is held to discuss timelines, logistics, and the desired implementation process
