

M365 Tenant Risk Index

Security

Identity protection, access controls, threat protection, email and collaboration security

Governance

Administrative roles, policy enforcement, auditing, lifecycle and access governance

Best Practices

Microsoft-recommended configurations, baseline alignment, operational hygiene

How the score works

- 100+ security and configuration checks are evaluated
- Findings are risk-weighted and prioritized
- Results roll up into a single Tenant Risk Score
- Fixing high-risk gaps reduces exposure and improves the score over time

Reduce measurable Microsoft 365 tenant risk and track continuous security improvement.
