

Microsoft Azure OpenAI for Independent Software Vendors

Embrace the digital revolution.

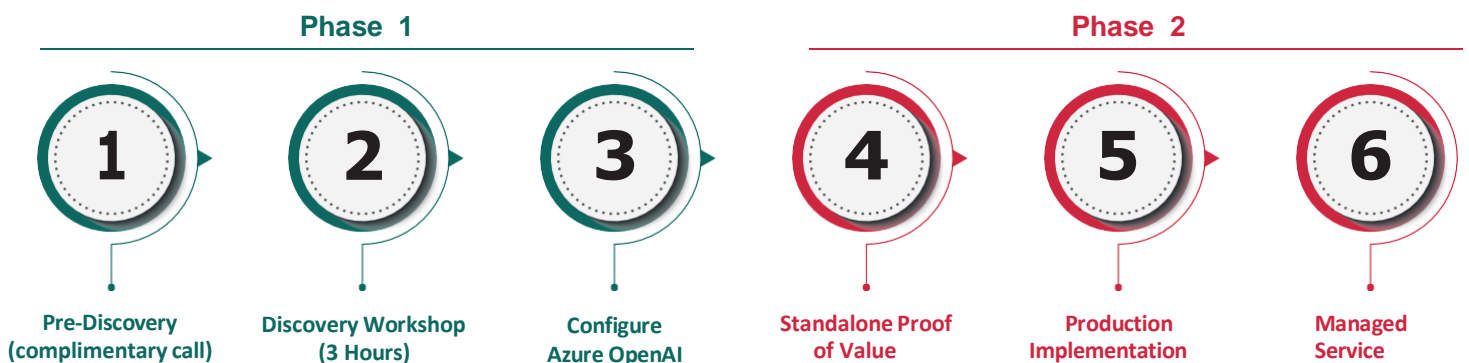

The recent advances in OpenAI such as ChatGPT, are quickly transforming everyday tasks, making our jobs not only easier, but smarter and more productive as well. The reality is that the Artificial Intelligence revolution is here to stay and will impact almost every aspect of business and our personal lives. The future of work is the Augmented Workforce supported by AI Co-Pilots using Azure OpenAI.

Unless you have AI Based Co-Pilot capabilities in your own software product you may be missing the opportunity to deliver substantial efficiency gains to your customers and risk being leapfrogged by a competitor. Whether your product runs in the Microsoft Azure Cloud, AWS, Google, IBM or somewhere else, we can enable your product to take advantage of the advanced Azure OpenAI capabilities by designing, building, and managing for you a custom configured Azure OpenAI instance accessed through a tailored API.

Azure OpenAI provides you with a private, secure and GDPR compliant instance of OpenAI supplemented by other Azure AI services and capabilities enabling you to extend your product to include AI Copilot features with due regard to legal requirements, ethical issues, and tech limitations.

We can accelerate and de-risk your AI journey. Our standard approach is shown below but we can also deliver custom journeys to meet specific needs, feel free to ask AI@tekenable.com.

Azure OpenAI Accelerator for ISVs with TEKenable

Why TEKenable

Early adopters of AI technology working with Microsoft AI solutions for over six years we are Data and AI certified Microsoft Managed partners, experts in the Azure Platform and one of a very select set of partners that are using the Azure OpenAI preview and included in Microsoft briefing sessions about the product's evolution and capabilities. TEKenable has over 20 years' experience of bespoke software development, including product development. We are an Irish technology company with over 160 staff, ISO 27001, 13485 and 9001 certified and in the Deloitte Fast50 in 2019, 2020 2021 and 2022. We won the Deloitte Impact Award for Technology in 2019 & 2022.
