

# Migrate Modern Cloud Analytics

## 3 Week Assessment for SAP Analytics Roadmap

**TekLink is offering a 3-week strategy and roadmap for migrating your company's SAP Analytics to Microsoft's Modern Cloud Data Warehouse platform.**

Our team will guide you through a workshop which will allow you to maintain your current investment in your existing SAP Analytics platform while combining with Microsoft's Modern Cloud Analytics Platform. TekLink's experts

Microsoft Azure platform will provide the data foundation which can be used for advanced analytics, self-service and other analytical and machine learning applications.

Our Cloud Data experts will guide your team through this important 3 week session.

- Understanding your current Analytics Data Landscape
- Map out your organizations' Analytical Data opportunities and weaknesses
- Establish your desired state for your Cloud based Infrastructure and Reporting Tools
- Workshop on the best tool to perform reporting of transactional vs. analytical data
- Develop and define your Cloud Based Business Intelligence Framework and Goals
- Cost Optimization and best practices for performance

### Deliverables

- 3 week, Solution Architect led workshops for a Analytics Platform
- Key Decision Document
- Current Landscape Mapping
- Future State Diagram
- Roadmap for deploying the new Analytics Platform
- Best practices for cost and performance optimization
- Optional upgrade to Proof of Concept Model

### Assumptions

- Client will provide agreed resources for our joint workshops
- Strategy Workshop is based on up to 2 SAP system (e.g., S/4 and BW)

**TekLink's Microsoft Azure Consulting Pricing may vary based on your requirements, number of applications, and existing maturity with cloud technologies.**
