Insurance Policies:	Lloyd's Insurance Policy (ESI009439134) for Professional Indemnity, Third Party Liability and Products Liability.

Emergency Notification

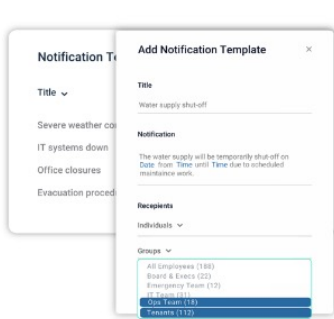

During an emergency, the speed and accuracy of critical information communicated has a life-altering impact on safety. Tekmon allows you to reach tens, hundreds or thousands of recipients via SMS, E-mails & Voice Calls immediately with the press of a button.

- ✔ Save critical time during emergencies.
- ✔ Eliminate human error by preparing notification templates with instructions based on your SOPs in advance.
- ✔ Ensure that critical messages are sent, delivered and acknowledged.

Automate emergency notification and improve call out times!

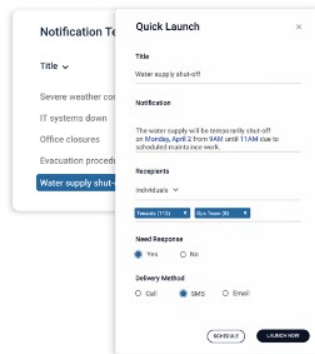

Tekmon provides critical communication capability to meet regulatory requirements, improve emergency response, to help protect life and property.

1

Create Alert Templates

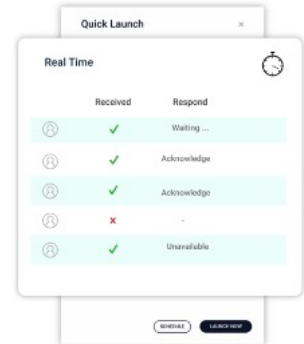

Create alert templates in multiple languages and assign a group of recipients. Add predefined replies to receive real time feedback from each recipient.

2

Initiate an Alert

Initiate an incident with a press of a button. The system begins to reach recipients via SMS, E-mails and Voice Calls. Advanced built-in escalation logic makes sure that when a recipient is not available at a channel, the next in line is automatically triggered.

3

Monitor in Real-time

As the system begins to reach recipients, on a central dashboard, the sender is able to track notification progress and response statuses in real time.

Athens International Airport

Athens International Airport is the largest international airport in Greece, serving the city of Athens and region of Attica. As of 2021, it is the 16th-busiest airport in Europe and the busiest and largest in the Balkans.

The Airport Service Operations Center (ASOC) wanted to digitize their emergency response protocols through an integrated platform for incident and disruption management of airport operations.

Key Facts

Industry: Transportation / Infrastructure
Use Case: Emergency Alerting
Year: 2019

Need

Contain and control incidents efficiently.

Disseminate information to thousands of stakeholders at once.

Get real-time feedback.

Solution

- ✔ Digitized emergency protocols.
- ✔ Unified contact management system.
- ✔ Two-way communication capability via SMS, email & Voice calls.

Results

- ✔ Up to 95% reduction in the time required to update.
- ✔ Rapid two-way communication keeping costs to a minimum.
- ✔ Immediate mobilization of emergency response teams.
