Microsoft Azure Cloud Foundations

You deserve a flexible, secure cloud.

Managing infrastructure services efficiently at scale requires a robust, agile cloud foundation. Our certified experts will combine Microsoft Azure best practices with all the experience that comes from hundreds of enterprise implementations to help drive towards high-impact initiatives.

The Value of a Sturdy Cloud Foundation

Leveraging a solid cloud foundation solution that prepares for automation and the orchestration of infrastructure improves reliability, security, and efficiency. Our Cloud Foundation Solution promotes iterative maturity to minimize disruption in daily operations while giving a clear roadmap to success.

Our Cloud Foundation Solution incorporates your complex goals and leads to incredible, agile benefits:

Faster Time to Market
Automation and standardization are crucial for both the speed of development and deployment. Get features to your users sooner.

Advanced Security
Streamlined, consistent, built-in, and automated compliance and security measures across all environments reduces complexity and risk.

Scalability & Flexibility
Spinning resources up and down as needed, when needed saves time, money, and frustration.

Reduced Cost
Since resources can be spun up and down as needed, you'll avoid overbuilding and overprovisioning.

Data Loss Prevention
Backup and disaster recovery features are invaluable. Storing in the cloud versus locally increases resilience and decreases time to recover from malicious threats.

Cross-Functional Collaboration
Anywhere there's an internet connection, data can be accessed. Limiting teams by location can stunt collaboration, performance, and efficiency.

ABOUT TEKSYSTEMS

We're TEKsystems. We accelerate business transformation by solving complex technology, business and talent challenges—across the globe. We partner with 80% of the Fortune 500 to create solutions that enable them to capitalize on change. TEKsystems is an Allegis Group company. Learn more at TEKsystems.com.

Our Services

- **SOLUTION ASSESSMENTS**
  Let us deep-dive and align your plan to adopt, modernize, or migrate to Azure cloud.

- **AZURE LANDING ZONE**
  Have us build a muti-subscription Azure environment that accounts for scale, security governance, networking, and identity. Our approach considers all platform resources required to support an application portfolio. We use a code-based approach for cloud resource deployment and configuration.

- **WAR REMEDIATION**
  Perform a Well Architected Review (WAR) and remediate deficiencies in an existing cloud operation or workload.

- **DEVOPS SOLUTIONS WITH AZURE DEVOPS AND GITHUB ENTERPRISE**
  Develop universal application integration and deployment "pipelines" and Agile project management tools.

- **GOVERNANCE AND SECURE OPERATIONS W/ HASICORP SENTINEL AND MICROSOFT SENTINEL**
  Security Policy-as-Code, Security Incident, and Event Management (SIEM) and Security Orchestration and Response (SOAR)
