

Migrate Power BI Premium to *Fabric*

Power BI Premium has moved to Microsoft Fabric, and its SKUs are being retired. You'll need a Fabric SKU at the end of your agreement with Microsoft, or you can switch earlier.

Our comprehensive migration service is designed to transition your organisation from Power BI Premium to Fabric seamlessly. We understand the importance of migrating in a way that minimises disruption and maximises the benefits.

OUR MIGRATION APPROACH

Our team of experts will guide you through a structured migration process to ensure a smooth transition with minimal disruption to your operations. Our approach includes:

1 Assessment and Planning

We conduct a thorough assessment of your current Power BI Premium environment to understand your specific requirements and challenges. Based on this assessment, we develop a customised migration plan.

This stage also gives an opportunity to review other aspects of your Power BI Deployment for example looking at the internal charging model for capacities.

2 Configuration and Optimisation

We will design and configure your new Fabric environment to align with your business needs. This includes provisioning Fabric SKU's setting up security protocols, optimising performance.

You can also use this opportunity to clean up your environment by consolidating workspaces, removing unused ones and looking at poorly performing models.

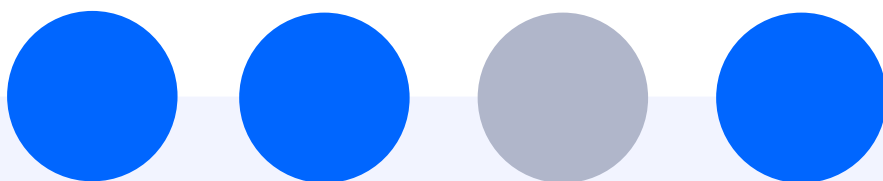

3 Workspace Migration
Our team will handle the migration of your workspaces, ensuring minimal disruptions. Using the Fabric API's, we can do this at scale quickly and efficiently.

4 Training and Support
To ensure your team is fully equipped to take advantage of Fabric, we provide comprehensive training sessions highlighting the differences between Fabric and Premium. Additionally, our Managed Services Team is available to assist with any queries or issues post-migration.

5 Ongoing Monitoring
We can deploy additional reporting to allow you to monitor and understand your tenant with more detailed information than is in the Fabric App.

6 Generation of a Roadmap
We will work with you to create a road map for Fabric that ensures is scalable and cost efficient.

WHY CHOOSE US?

-  **Expertise**
We are a Fabric Featured Partner with extensive experience of Microsoft Fabric and the Power BI components within it.
-  **Proven Track Record**
We have successfully migrated other organisations to Fabric from Power BI Premium.
-  **Customer-Centric Approach**
We prioritise your business goals and work collaboratively with your team to ensure a smooth and successful migration.
