MICROSOFT 365 BRINGS TOGETHER THE TOOLS WE NEED TO WORK TODAY.

With its powerful business applications, Microsoft 365 enables seamless work, collaboration and, productivity so that organizations can thrive. With its deeply integrated, sophisticated security features, Microsoft 365 lets them do so securely.

But complexity, dynamic business needs, and evolving security threats challenge organizations' abilities to configure and protect Microsoft 365 properly, resulting in security gaps, increased cyber risks and additional costs for often unnecessary security solutions.

MICROSOFT 365 SECURITY

Microsoft 365 Security by Telelink Business Services helps organizations create and maintain a secure Microsoft 365 environment, carefully adjusted to their ways of working and set up to mitigate malicious intentions as they constantly adopt new techniques.

1

REDUCE CYBER RISK

Security configurations of your Microsoft 365 environment are adjusted to your business processes and security best practices, mitigating flaws (technological and human) that adversaries could take advantage of.

2

IMPROVE SECURITY

Your organization quickly implements new Microsoft 365 security features and adjusts configurations to meet evolving business needs and cyber threats.

3

OPTIMIZE USAGE AND COSTS

You derive more value of your Microsoft 365 subscription by adopting all security capabilities it provides. Additionally, you minimize costs for licenses due to underused applications and services.

4

IMPROVE EFFICIENCY

With security of your Microsoft 365 environment taken care of, your IT team can focus on strategic digital initiatives that will push your organization even further.

MICROSOFT 365 SECURITY
IN YOUR ENVIRONMENT

We follow a simple model that allows for Microsoft 365 environment to be both adjusted to your business needs and processes, and the same time fit to address evolving security threats.

ASSESS

We assess your specific business needs and requirements and evaluate the associated cyber risks. We then analyze the setup of your Microsoft 365 environment to identify areas of improvement – in licensing, configurations, security controls, and utilization of available Microsoft 365 products and services.

DESIGN

We provide your IT team with a detailed plan to protect your Microsoft 365 environment by leveraging all applicable security features and configurations – making optimal use of your investments. Based on our findings, our recommendations may extend to reducing costs for under- or unutilized Microsoft 365 products, services, or licenses.

DEPLOY

Once you and your IT team approve the plan, we proceed with its deployment in your environment, ensuring security best practices are efficiently and thoroughly applied through all available security configurations and controls.
