

# MAXIMIZE YOUR TEAM'S PRODUCTIVITY EITHER REMOTELY OR ONSITE

**Productive Teamwork Enablement by TBS** is designed to support you throughout the whole journey to the modern workspace leveraging the latest Microsoft technologies. The solution combines Microsoft 365 implementation with onboarding & adoption training sessions enabling you to take the complexity out of your work-day while stay focused on the core business activities and empower your team to perform at its best.

## Complete and integrated toolset to meet all your business needs

**Microsoft 365** brings together favorite productivity tools like Word, Excel, Outlook and Microsoft Teams, advanced remote access, security and device management capabilities - one solution with all features to run and grow business while the information stays protected.

## Everything in one place with Microsoft Teams

Post files for everyone to edit or view

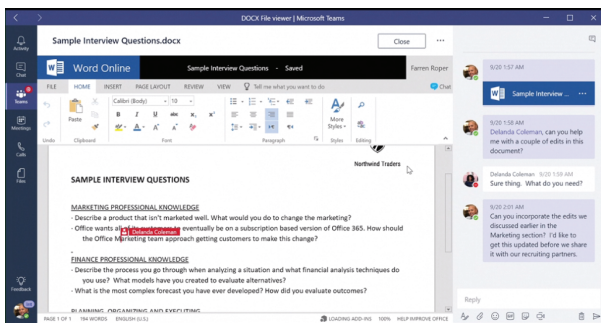

Work on documents together with your team. All changes are automatically saved

Find what you need with a search across people, files, and conversations within one workspace

Have an audio or video call with a colleague, external partner or customer

Organize projects by team & channel

Do private or group chats, communicate easily across different locations

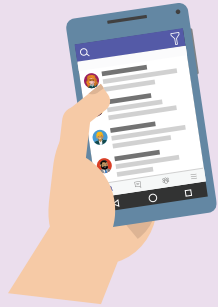

# MEET STEPHAN, GENERAL MANAGER, SEE

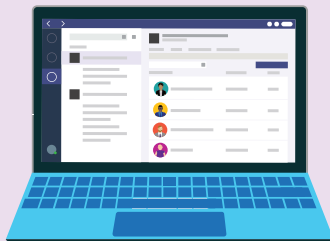

On Monday Stephan has a regular review meeting in Teams with the Country Managers for Bulgaria, Macedonia, Albania, and Serbia.

During the week, he quickly assigns tasks with Planner in Teams and tracks on the progress.

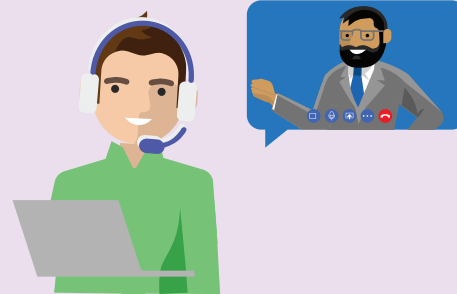

When on the go, Stephan goes through the new sales proposals in Microsoft Teams mobile app and leaves comments. His cross-country team can easily adjust the files together without wasting time to send emails back and forth. And all the updates are automatically saved!

Throughout the week, Stephan has to check the quarterly results of each subordinate entity. In a private channel with the Financial team, he gets notified that the reports are ready for his consideration. Now he can access all documents directly in Teams.

On Thursday, Stephan has a 1:1 meeting scheduled with an important client to discuss a new co-sell partnership. As they both use their cameras, it feels like a face to face meeting.

Another busy week is at its end. On Friday afternoon, Stephan uses Teams to announce the quarterly results and prize his teammates on the excellent performance.

## Accelerate your team effectiveness starting today
