

Derive Maximum Value from investment in Microsoft 365

TBSACM Services

TBSACM is an empowering specialist service package created to support change management activities needed to drive efficient and sustained adoption of Microsoft 365 tools. We are here to supplement and help build up your internal capabilities with a goal to successfully realize the full benefits of Microsoft 365 suite.

WHAT WE OFFER

TBS is one of the biggest and most modernized System Integrators in Bulgaria and the CEE region. With over 18 years on the market we have extensive track record of successful projects in various industries. We are proud to offer our services and empower businesses to make the most of Microsoft 365 and the transition smoothly to new ways of work and to the Cloud.

TBSACM services are tailored to each client needs. We offer an end-to-end service package including migration and technical implementation, as well as planning and execution of adoption and change management strategy. We carefully analyze the impact of introducing new tools to the various stakeholders. We prepare and deliver communication campaigns, workshops and trainings in the most effective format for each user group.

WHAT OUR CUSTOMERS ARE SAYING

"We have successfully partnered with TBS to increase adoption and deliver effective change management for the client's employees before, during and post deployment of Office 365. TBS created and delivered a tailored communication approach and trainings related to the migration from Lotus to Office 365 exchange in a timely and professional manner. TBS team has been and still is very responsive and adaptive if/when change of action is required. The project is receiving positive feedback from all client stakeholders." **Stjepan Vukovic, Director, InfoCumulus**
