Business Transformation Suite

TP Business Transformation Suite offers a holistic, end-to-end consulting service designed to drive business efficiency, innovation, and exceptional customer experiences. Leveraging the power of Microsoft Power Automate, Power Apps, Power Pages, and Copilot Studio, we help businesses accelerate their digital transformation by streamlining operations, automating workflows, and delivering actionable insights that propel growth.

With TP's deep industry expertise, flexible delivery models, and focus on measurable outcomes, we provide scalable solutions that integrate seamlessly with your existing systems. Our approach is tailored to your unique business needs and focused on delivering rapid ROI and sustainable results.

Overview of Our Offerings

Service

Offer a structured method for evaluating and planning the migration of RPA solutions to Microsoft Power Automate. This involves comprehensive analysis and strategic planning to provide clients with a clear roadmap before starting any development.

Cost and Timelines

Product Category: Power Automate

Duration: 2 weeks

Indicative Pricing: Free

Model: Remote assessment

Why TP

Experience in migration feasibility assessment with analysis of over 150 processes across various domains. Offers global best practices, standards, and the familiarity with latest features of Power Platform for developing effective solutions. This approach includes Security by Design to ensure a safe and compliant migration.

Deliverables

- **Process/LOB understanding:** Detailed documentation of the current process and line of business.
- **Environment strategy :** Validation of environment settings.
- **Inventory validation (scripts, code, tools):** Comprehensive inventory list of scripts, code, and tools.
- **Tool fitment analysis:** Analysis report on the fitment of tools.
- **License optimization & indicative benefits:** Optimization plan for licenses and a summary of indicative benefits.
- **High-level roadmap for migration:** High-level roadmap outlining the migration plan.

Engagement Terms

- Provide timely access to relevant systems, data, personnel, environment, and applications.
- Supply a project inventory and a script/code inventory.
- Assign a single point of contact for coordination.

360-degree business transformation assessment

Our comprehensive 360-Degree Business Transformation Assessment delivers actionable insights to revolutionize your operations. Through a collaborative and strategic approach, we help you uncover automation potential and craft a tailored roadmap powered by Microsoft Power Platform for enhanced efficiency and agility.

Key features

Current stage analysis

Evaluate workflows, technologies, and automation maturity to establish an operational baseline.

Automation opportunity identification

Pinpoint "quick-win" opportunities for immediate productivity gains.

Organizational readiness evaluation

Ensure smooth Power Platform integration with minimal disruptions.

Key deliverables

Assessment Report

Detailed documentation of current processes and areas for improvement

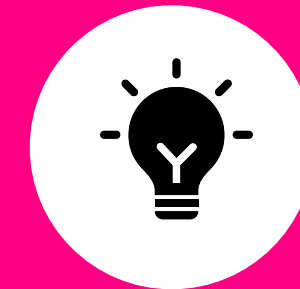

Quick-win automation recommendations

Immediate, actionable steps for productivity enhancement

Transformation roadmap

A phased, goal-oriented plan tailored to organizational priorities

Benefits

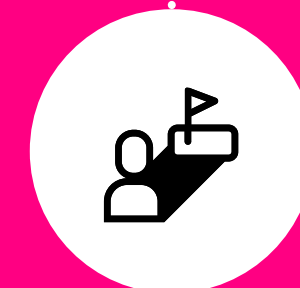

Strategic Alignment

Maximize ROI by aligning automation with key KPIs.

Informed roadmap development

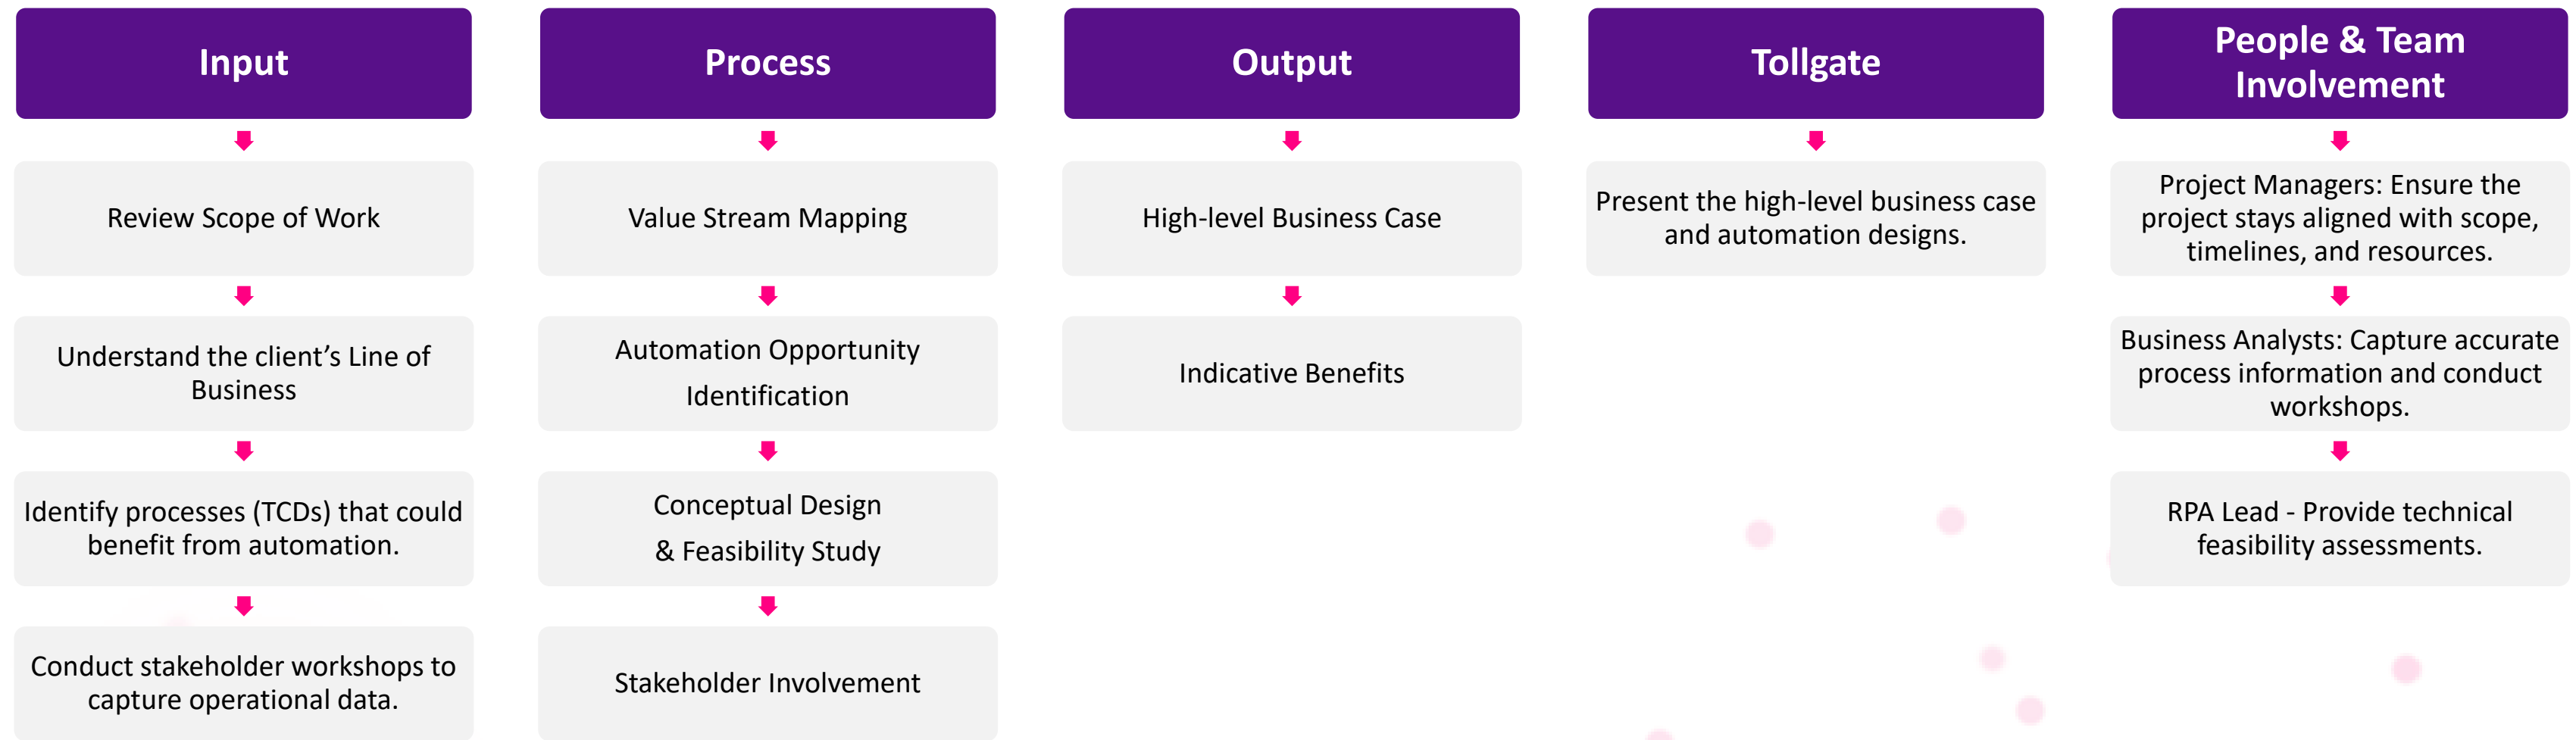

Enable a structured and phased implementation approach.

Enhanced decision-making

Provide leadership with actionable, data-driven insights.

Assessment as a Service framework

RPA Migration service

This framework provides a structured approach for assessing and planning the migration of RPA solutions to Microsoft Power Automate. It focuses on in-depth analysis and strategic planning to equip clients with a clear roadmap before any development begins. The initial phases aim to evaluate the current automation setup, determine feasibility, and establish a tailored migration plan.
