telestream | kumulate

Version 2 is here.

A more powerful, more intuitive core,
sleek new interface, and a suite of new functionality.

Here's a quick look at some of them.

Telestream Kumulate v2 is the latest generation of the multi-award winning video & content storage management platform. It adds powerful functionality, and a next-gen, super-sleek interface.

Intuitive new interface

A completely re-designed, next-gen interface for Kumulate modules for a smoother, more intuitive user experience

Adobe panel

Direct archive and restore of clips, sequences and projects from within Adobe Premiere
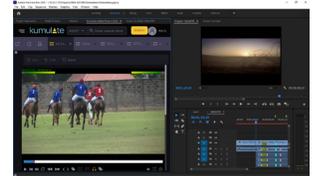

Enhanced storage locations

New interface & enhanced functionality for easier management of cloud and on-premise storage locations

Smart reporting and analytics

At a glance dashboards give overview of throughput, capacity, performance and failures, plus enhanced reporting functionality
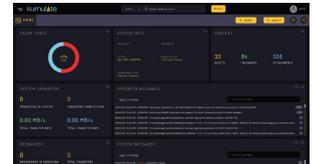

More configurable user experience

New options enable increased customization of dashboard, search and content page settings

Enhanced security and file validation

Hash-checking to validate in-transit and at-rest files

Support for new Avid environments

Integrates directly into all Avid environments, including Avid Media Central UX

Significant under-the-hood enhancements

Improved REST API and completely overhauled infrastructure deliver improved performance and seamless 3P integrations

AI & machine learning workflows

Seamless integration of AI & ML services into your workflows

Book a demo or **schedule 15 minutes** with an architect.
