

Windows 365 Rapid Deployment

Users want technology that is familiar, easy to use, and always available so they can work and create fluidly across devices and locations.

IT needs solutions that can be implemented easily, securely and managed using familiar tools.

Windows 365 fuses the scalability and security of the cloud and the familiarity of a PC into one seamless experience.

Why Windows 365

Streamlined Onboarding and Provisioning

Business Continuity

Enhanced Workflow Efficiencies

Security and Regulation

Remote and hybrid work

Hybrid Windows for a hybrid world of work.

Windows 365 lets you Securely access your desktop, apps, processing power, storage, and more, on any Windows, MacOS, iOS, or Android device, anytime, anywhere.

What you will get:

- A discovery workshop report of your company's readiness to implement Windows 365
- Creation of a Windows 365 Provisioning Policies aligned to Microsoft best practices
- Creation of basic Intune Compliance and Configuration Policies for Windows Devices
- Configuration of a dedicated Azure virtual network
- Connection into your organization's On-premise Active Directory Domain
- Configuration and Deployment of up to five Windows 365 machines
- Creation of Conditional Access Policies dedicated for Windows 365
- End-User and administrator training sessions with accompanying guides

This will be the first step in your company's adoption of Windows 365 it will allow you to:

- See what Windows 365 has to offer through hands-on experience
- Gain direct feedback from your employees around how it can improve their productivity
- Create the foundations to allow your business to adopt Windows 365 at scale
- Understand the security and administration benefits of Cloud PC
- Assess if Windows 365 is right for your business

Loved by users

Streamed to any devices

Always ready and updated

Personal and familiar

Trusted by IT

Scalable and resilient

Predictable costs

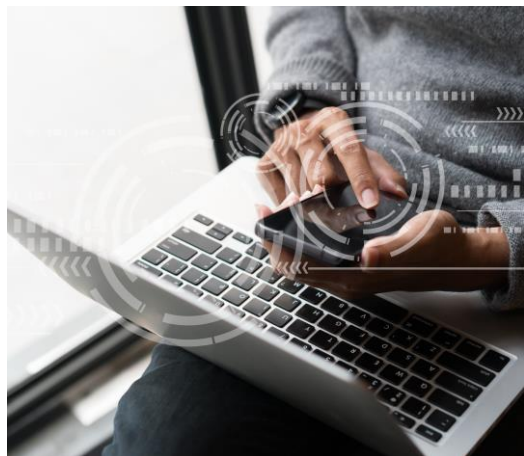

Simple to buy, deploy, and manage

A simpler, lower-risk way to build a customer-centric framework for the future

Why Use Telstra Purple for Windows 365

With Telstra Purple solutions for Windows 365, you can:

- Understand how you can improve business continuity and mitigate risk through Cloud PC.
- Determine the technical requirements including bandwidth, licensing, security, use cases and personas, performance requirements, and applications.
- Gain an overview of the configurations to suite a variety of needs, from simple task-based operations, mainstream information worker needs, to demanding GPU-based workloads.
- Understand how you can deploy, manage, and decommission Cloud PCs with familiar Microsoft Endpoint Manager (MEM) tools. Manage the computing lifecycle of a Cloud PC with the same tools used to manage a physical device.

Learn more about what's included in the service and how to get started fast, with discovery workshop or rapid deployment.

Windows 365 Discovery Workshop

Starting from	Estimated Duration
No Charge - Investment from Telstra and Microsoft	1 Day

Windows 365 Rapid Deployment

Starting from	Estimated Duration
USD \$5,000*	5 Days

Microsoft Licensing

Basic	Standard	Premium
2 vCPU	2 vCPU	4 vCPU
4 GB RAM	8 GB RAM	16 GB RAM
128 GB Storage	128 GB Storage	128 GB Storage

Assumptions:

- Organization has already deployed an Azure and Microsoft 365 tenant
- Azure Active Directory Connect has been deployed
- Hybrid Azure Active Directory must be configured
- Organisation are already using Conditional Access Policies

**Telstra is a Microsoft managed partner and will explore any potential deployment funding through available funding programs.*

Telstra Purple
