AI Content & SEO Performance
Platform

Bifrost Editor

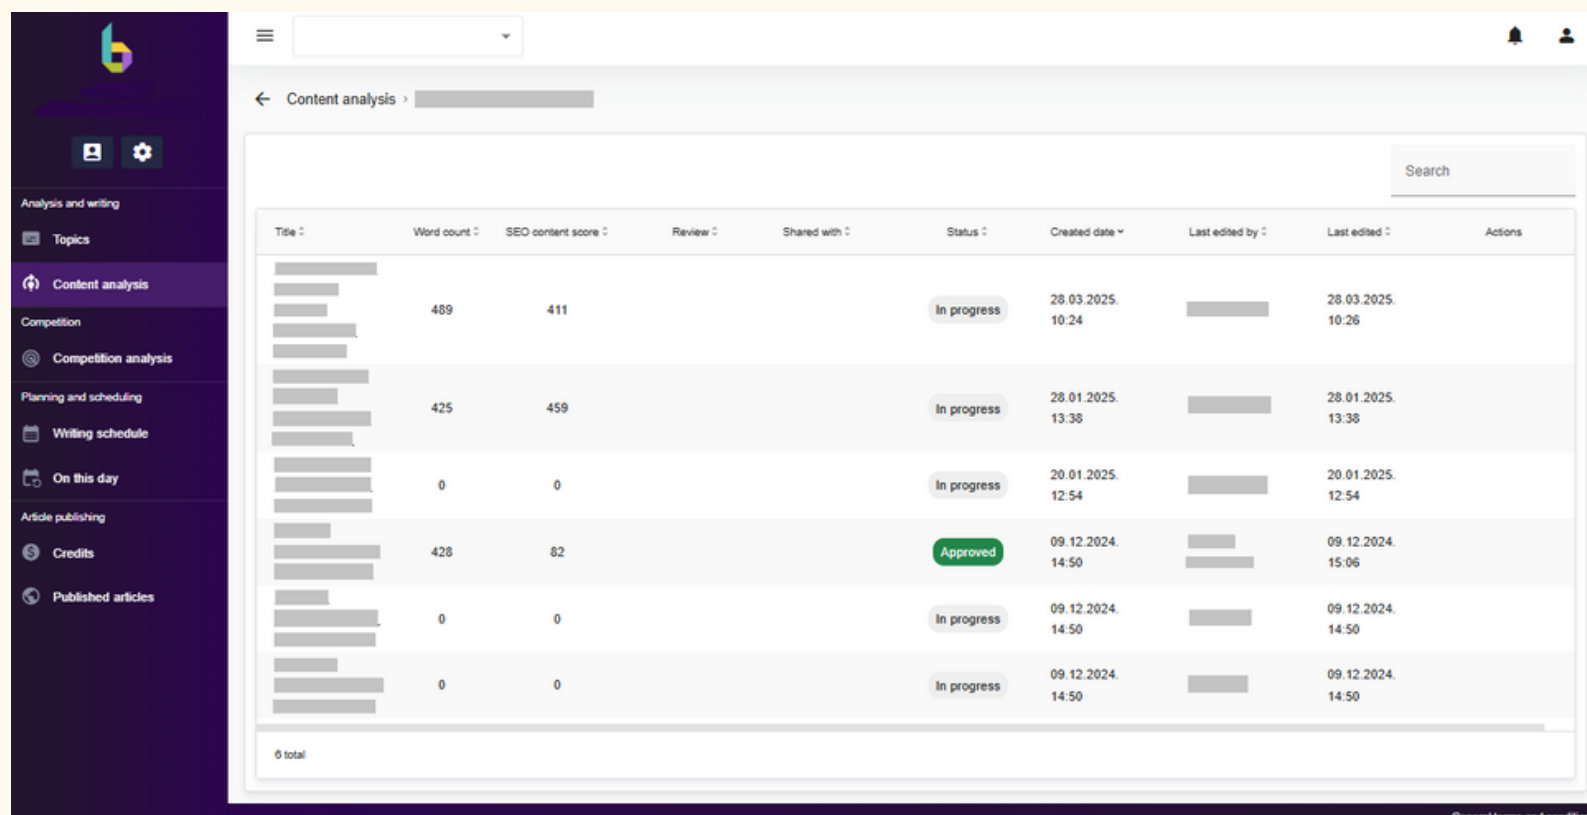

Bifrost Editor is a solution based on artificial intelligence, designed to enable small and medium-sized businesses to achieve results comparable to large brands – but with significantly lower investment.

What does the offer include?

AI SEO Specialist – connects to your Google Analytics and Search Console accounts, analyzes thousands of data points, proposes an optimal SEO strategy, and independently creates content.

Each week, it prepares search-engine-optimized blog posts tailored to your users. It automatically performs internal linking between your pages, further improving site structure and SEO performance.

The screenshot displays the 'Content analysis' section of the AI SEO Specialist dashboard. The interface includes a sidebar with navigation options: 'Analysis and writing', 'Topics', 'Content analysis' (selected), 'Competition', 'Competition analysis', 'Planning and scheduling', 'Writing schedule', 'On this day', 'Article publishing', 'Credits', and 'Published articles'. The main content area features a table with the following columns: Title, Word count, SEO content score, Review, Shared with, Status, Created date, Last edited by, Last edited, and Actions. The table lists six items, with the first two having word counts and SEO scores. The status of the items is 'In progress' or 'Approved'.
