# Making a difference for our Client Hybrid Cloud Transformation journey using Cloud Advisory, Migration, Modernization and Application Development Offerings on Azure

## IBM Consulting - Azure Hybrid Cloud Transformation:

IBM Consulting is a Trusted Partner for Global Azure Customers, across the Industry, differentiates its solutions with pre-build offerings, strong alliance with Microsoft and Red Hat, applying innovative engagement models (IBM Garage Method and Dynamic Delivery) and leveraging world best Azure competencies.

### See what customers are saying:

*"With IBM Services and Microsoft, we have cooked up something extra-special: a first-class online experience that makes life easier for Girl Scouts and councils." ([link](#))*

*- Mary Alice Callaway, Vice President for Sales and Marketing, Interbake, Weston Foods*

## WHAT WE OFFER

1. **Cloud Advisory Offerings** - accelerates enterprise hybrid cloud journeys aligned to business outcomes by plotting a path of holistic transformation across the IT estate
2. **Cloud Migration and Modernization Offerings** - outcome-driven integrated execution across multiple dimensions (cloud platforms, operating model, app portfolio & security) – all based on portable, open architecture foundation.
3. **Cloud Application Development and DevOps Offerings** - delivers predictable value through cloud application development on Azure leveraging AI, IoT, Data and Insights components and services.

# Hybrid Cloud Transformation on Azure Offerings in details

To support your Cloud transformation on Azure, we have developed end-to-end guidance on crucial hybrid cloud journeys as follows:

## Application Migration & Modernization

- Migrate VMware workloads to Azure
- Rehost workloads to Azure VM
- Migrate Windows apps to Azure (Windows) VM
- Migrate Linux (RHEL) apps to Azure (Linux) VM
- Migrate desktop workloads to Azure Virtual Desktop
- Containerize apps with Azure container services (AKS)
- Modernize monolithic apps into microservices on AKS
- Modernize monolithic apps into microservices on ARO
- Modernize apps with Azure PaaS (App Service)
- Modernize apps with WebSphere Hybrid Edition on Azure

## Cloud Native App Development & Hybrid Integration

- Build cloud-native apps using Azure serverless services
- Build apps with Azure PaaS (App Service)
- Build microservices apps on AKS
- Build microservices apps on ARO
- API Enablement on Azure
- Integrate apps on Azure using Azure integration services
- Hybrid integration with CP4I on Azure
- DevOps adoption on Azure

## Data Migration & Modernization

- Migrate SQL DB to Azure VM (IaaS)
- Migrate Oracle DB to Azure VM (IaaS)
- Migrate SQL to Azure Managed Azure SQL DB
- Migrate PostgreSQL to Azure Managed PostgreSQL DB
- Migrate MySQL to Azure Managed MySQL DB
- Migrate MariaDB to Azure Managed Maria DB
- Migrate MongoDB to Azure Managed Cosmos DB

## Hybrid Cloud / Cross-Portfolio Solutions

- Hybrid Cloud Solutions with Azure Arc
- Hybrid Cloud Solutions with Azure Stack Hub
- Hybrid Cloud Solutions with Azure Stack HCI
- Hybrid Cloud Solutions with Azure Stack Edge
- High Availability Solutions on Azure
- Migrate Storage on Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
