Tener Technologies can Guide your Azure Migration

ABOUT TENER TECHNOLOGIES AZURE MIGRATION SERVICES:

Tenertech offers a comprehensive service to migrate your existing environment to Microsoft Azure. The first step is to build a test environment and show how well the system works.

WHAT WE OFFER

Tener Technologies has been offering cloud services for over twenty years. Originally founded as a web hosting company, we understand the importance of uptime, security, and reliability. Moving organizations to the cloud is one of our specialties.

A cloud migration Proof of Concept (PoC) is an important setup in your cloud journey. Our PoC provides a test bed where we can migrate your workloads and applications to a cloud environment where testing for coding issues, compatibility and more is possible. This allows you as well to gain experience, test ideas, and deepen your understanding of cloud computing. The migration and transformation of mission-critical servers, apps and workloads is complicated, but we will make sure the migration is successful. Once the PoC is completed, you will have the piece of mind to continue your cloud migration, either on your own or in partnership with our technicians.

Contact us and you will learn more about how we can help you.

This PoC will include:

- Data collection
- Infrastructure analysis
- Azure subscription setup
- Infrastructure design and setup
- Azure Migration of an application, virtual machine, or database

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
