

Rapid Deployment and management of hybrid, multi-cloud virtual desktops and remote workstations

Digital workspaces powered by HP Anyware

Introducing the new evolved HP Anyware, now easier than ever to manage and scale. The enhanced HP Anyware combines the existing high-performance solution with new deployment and scalability capabilities—ensuring a secure remote access environment for your diverse workforce needs.

The evolved HP Anyware manageability solution is based on a modern, multi-tenant, Software as a Service control plane that enables deployment flexibility across devices and networks.¹

Rapid, flexible, and scalable deployments

Provides secure remote access to hybrid environments¹ from various devices and over varying network conditions.

Zero trust security model

Allows secure remote access for data and applications to help meet security and compliance regulations.

SaaS-first approach

Delivers a consistent user experience for a diverse workforce with a reduced IT footprint.

Why HP Anyware

The SaaS-first model accelerates cost-effective secure and rapid deployments and task automation with a strong security suite based on zero trust principles and VPN-less gateways, to keep your sensitive data protected. The new HP Anyware management plane automates recurring tasks and minimizes IT footprint and management overheads.

Accelerating deployments across devices and networks

Rapid and flexible deployments across devices and networks, offering provisioning and lifecycle task automation support for hybrid environments. This enables efficient and secure remote access for the distributed workforce.

Efficiently scale with a cloud-based session gateway

Efficiently scale with HP cloud gateways removing the need for on-premises setup, allowing end-to-end secure connections in hybrid environments.

Automating tasks and remediating problems faster

Proactively automate repetitive tasks and remediate issues faster, lowering operational expenses and improving IT efficiency.

Real-time troubleshooting

Perform instant troubleshooting for secure and compliant issue resolution.

Enhance user experience across a diverse workforce

Provide a consistent and seamless user experience across devices and locations, to enhance satisfaction, from knowledge workers to graphic professionals.

HP Anyware offerings to keep you connected and in control

Anyware Standard

Built for everyday workloads running on standard CPUs, this software subscription seamlessly connects knowledge workers to their remote or virtual desktops.

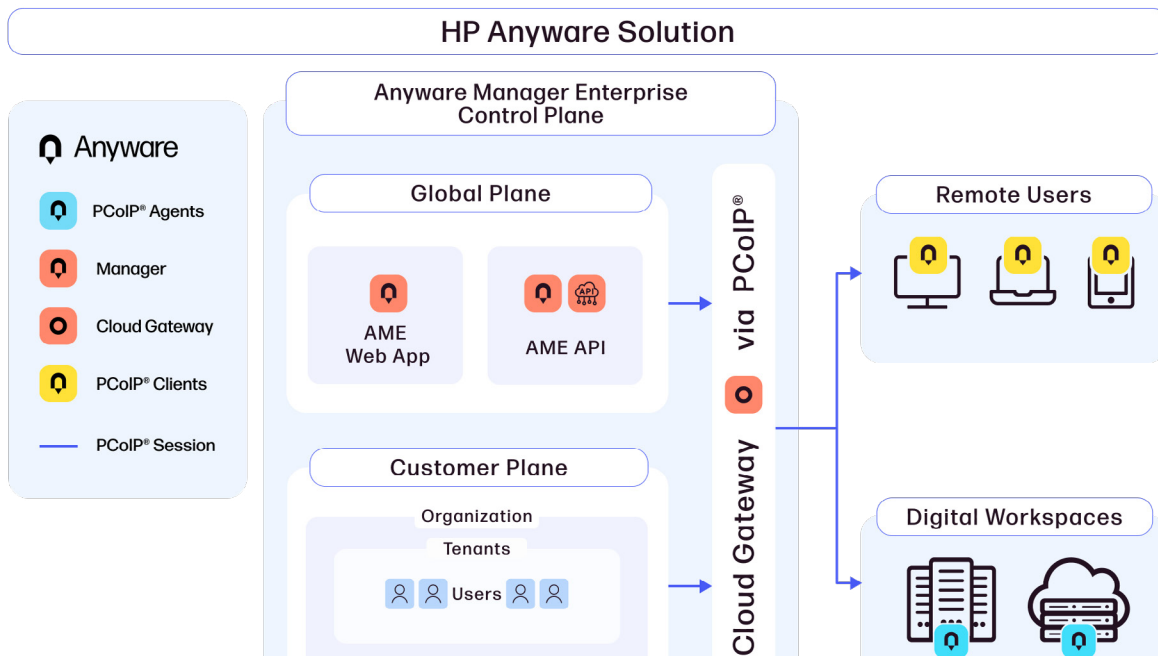

Anyware Professional

Designed for graphics- or data-intensive workloads requiring GPUs, this software subscription seamlessly connects users to their remote work virtual workstations.

Anyware Trust Center

Zero trust policy engine to help integrate a zero trust architecture. Interfacing with endpoint management tools, ensures endpoints follow security policies via real-time responses to policy incidents.
