

General Services Overview

Choosing TeraSky's comprehensive solution transcends mere consultancy services or the simple acquisition of a license. We offer a meticulously structured, phase-by-phase partnership designed to support you at every stage—right from the initial design to the complete execution. Our commitment is to walk alongside you, ensuring a seamless journey toward achieving your goals.

TeraSky Next Generation Data Center

integrates cloud methodologies into physical data centers, adopting a cloud consumption model for a streamlined, cloud-like experience. It aims to simplify operations and speed up project delivery through automation, which enhances lifecycle and provisioning processes.

TeraSky Kubernetes Adoption

Framework designed to guide organizations through the complexities of adopting Kubernetes, ensuring that they can fully harness its potential for orchestrating containerized applications. This framework includes planning, implementation, and operational phases, focusing on scalability, security, and efficiency.

TeraSky Cloud Operating Model

equips you with essential tools for a successful Cloud journey, focusing on Landing Zone setup, Compute and Storage optimization, Security, and DevSecOps. It ensures cost-efficiency, scalability, resilience, and multi-cloud readiness, along with streamlined developer onboarding and efficient management of teams and services.

TeraSky End-User Computing (EUC)

empowers secure, flexible remote collaboration across any device, enhancing productivity and streamlining IT operations. Through personalized digital workspaces, they deliver smooth user experiences, secure operations with a zero-trust approach, and centralized management.

Our service delivery is structured into three key phases to ensure your success:

- **Pre-Setup Services (Day 0):** We lay the groundwork by understanding your needs and setting up the necessary infrastructure for a seamless transition.
- **Rollout (Day 1):** Implementation phase, where we activate our solutions, ensuring integration and operational efficiency.
- **Post Rollout (Day 2):** We focus on optimization, evaluating performance to make improvements, and providing ongoing support for continuous enhancement.

At TeraSky, we focus on your success. Each client receives a dedicated Product Manager for a tailored journey from start to full implementation, assisted by a Customer Success team that is detail-oriented, and data-driven, all to provide excellent support.
