# TERASKY

Public Cloud Managed Services

TeraSky combines proprietary automated tools and people-powered services for MSP services that are built to optimize your cloud, streamline adoption, and accelerate innovation at every step. Whether you choose TeraSky as your reseller or purchase an independent MSP services plan, we are committed to providing continuous value that never expires.

Value-Focused Teams

Our customer success and support teams are dedicated to making your cloud consumption simple, cost efficient and safe.

Customer-Specific Onboarding

- Cost visibility tools that give you control and minimize blind spots.
- Onboarding to cloud management tools and walkthrough of built-in dashboard, tables and graphs.
- Custom dashboards tailored to your business – no noise, just value.
- Clear visualization of your cloud costs with precise cost analysis and optimization.

Our team of specialists will make sure you have full visibility over your cloud costs.

Resources That Keep You Sharp

- Specialized workshops and in-class training to reinforce your current skills or learn new technologies.
- TeraSky Multicloud Operating Model, our unique and field-tested methodology for multicloud optimization.

In-depth sessions with our field engineers to dive deeper into their battle-tested insights.

Cloud Customer Support

- Dedicated team of professionals focused on preventing and reducing disruption of your service.
- Ask the Expert - Have questions? Want to brainstorm new ideas? Let us help.

The support you need to safeguard your cloud operations and secure your business's continuity and growth.
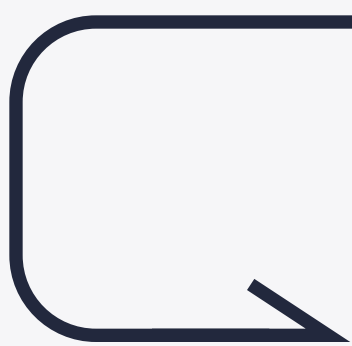

Expert Review Sessions

- Infrastructure review using our unique approach that combines DevOps, FinOps and infrastructure expertise.
- Custom tailored cost optimization according to your architecture, scale and operation model.
- Efficiency improvements that reduce complexity, costs and maintenance efforts.

Our experts will ensure that all efforts are aligned with your financial objectives.

Quarterly and Half-Year Business Reviews

- Regular, data-driven reviews and recommendations for better adoption – forever.
- KPI-driven approach with actionable recommendations - not another unimplementable cloud report.
- Professional insight to leverage cloud vendor financial boosts and service credits.

Periodic reviews fully correlate your cloud consumption with your business objectives.

Value-Focused Tools

Our platforms, tools and automation help you achieve more with less effort, simplify processes, and smoothly adopt new technologies.

Simple, Powerful Portal

- Cost optimization focus provides visibility into your cloud computing with actionable recommendations.
- Process automation from account creation to RDS right sizing
- Tailored insights, discovery tools, products, and services to optimize your specific environment.

A comprehensive, powerful, and simple solution to optimize your cloud operations.

Proactive Tools - your Future Safety

- Ongoing proactive monitoring to identify cost optimization opportunities .
- Proactive and reactive automations ensure resource tagging so you're always in control.
- Anomaly detection including unexpected workloads, not approved regions and accidental resource sprawl.
- Detection of end of life / end of support events to prepare you and avoid service outages.

Our automations address your cloud challenges proactively and continuously.

Ahead of the curve. Always.

- AI-based updates to help you discover new features for your specific environment as soon as they are released.
- Custom built labs and sandbox that allow you to learn about and explore new products and features.
- Expertise that extends beyond the cloud to AWS,Kubernetes, Hashicorp, Portworx, Tanzu, Spring Boot and more

We'll ensure you stay updated on the latest cloud innovations relevant to your specific environment.
