Enabling trust through proof.

The technology platform that provides proof of certifications and work experience.

Credivera

Make confident decisions throughout the employee lifecycle.

Remote workforces and an increase of skills-based training challenge organizations to verify if an employee's accomplishments are current. Now with a secure, digital, and globally transferrable solution, companies can verify the credentials of their workforce at any time while meeting all privacy requirements.

The Credivera Wallet

The application manages a worker's career records and credentials by directly sourcing verification from the issuing organization. The digital Credivera Wallet provides a dashboard indicating proof of compliance at any time for the worker and the employer.

Why Customers Use Credivera

- On-demand certainty of skills compliance
- Enhanced employee privacy and security
- Cross-platform functionality and integrations

> " CANA is committed to maintaining a first-class safety program while also executing with operational effectiveness. The construction industry is at a crossroad for change. Traditional processes don't always work in this new digital economy which consists of online training and remote work sites operating from phones or tablets. We wanted to innovate and with the increase of large projects, it has enabled us to scale fast and securely with Credivera.

Luke Simpson, President CANA Group of Companies   CANA

Safeguard Employers

- Real-time compliance
- Reduce risk of fraudulent career records
- Reduce time and costs verifying talents by location or project

Benefits
Discover the Savings

- Maximize micro-learning accomplishments into recognizable credentials

Promote A Verified Workforce
- Access training discounts with Network Partners
- Decrease proposal process from hours to minutes for job credentials

Privacy Protected

- Comply with latest privacy legislation
- On-board and off-board employee records with security and ease
- Individuals, not companies own the personal data

Access Identity With Confidence
- 99.5% uptime in the cloud
- Single-click blockchain functionality removes employee records from organization

How it Works

The Credivera Wallet deployed on Microsoft Azure allows customers to take advantage of the cloud to access their critical information from anywhere **with certainty.**

- Employees add their digital credentials from the training provider to their Credivera Wallet
- The integrated training provider provides a real-time verification status on the credential and flags upcoming expiry dates
- The employer can view the status of credentials by organization, project, or site location at any moment
- The employee shares their Wallet with employers in person or using a secure link and is notified when training renewal will be required

Credential Ready for Sharing

Authorized Issuer
