

Online tests in a digital school

RELIABLE RESULTS AND AUTOMATIC GRADING. NO MATTER THE CIRCUMSTANCES.

Knowledge assessment ecosystem

Testportal is a platform that enables reliable knowledge assessment online.

The integration with Microsoft Teams allows for easy test sharing and provides secure identity verification thanks to Azure AD. The scalable Microsoft Azure infrastructure guarantees stable operations.

Digital transformation by means of online tests

Exams,
working papers
and tests

Focus on automatic grading.

Homework

Can work great in its online form.

Competitions

Conduct school competitions in the form of online tests.

Create, share and analyze test results all in one place!

testportal

Testportal for Microsoft Teams **offers much more than the built-in Microsoft Forms app**. With Testportal you can secure your test, configure **time limits** and gain access to data that enables **detailed test analysis**. The *Honest Respondent Technology* will **mark each test leave**. If you would like to ensure greater oversight, you can also analyze the **video image from the students' device cameras**.

Digital knowledge assessment

- ✓ **Automatic grading**
- ✓ **Anti-cheating mechanisms** and live monitoring
- ✓ Restrictive **time limits**
- ✓ **Question drawing** algorithms
- ✓ **Advanced question content** creation and categorization
- ✓ **Detailed results**, reports and **statistics**
- ✓ **Data protection** and GDPR compliance

Trusted by

[...] I use the Testportal application to check my students' knowledge and skills, as well as to conduct periodic school subject competitions. Thanks to a variety of questions, I can assess students in a reliable way - they are not picking "any" answer at random. Preparing a good test or a question base takes a lot of time and work but the honest assessment compensates for it. [...]

Besides that, every student can complete a test at his/her convenience and the Honest respondent technology eliminates most forms of cheating.
