

Easily automate the anonymization of sensitive data.

ShareMedix by theBlue.ai is an intelligent platform that enables professionals **to anonymize** and **securely share** medical data in a **compliant way**.

“

The increasing need for anonymization was time consuming and expensive. With the ShareMedix intelligent software we can handle all of this with less time and costs for our staff and operations.

Pietro Lucillo, MA
IT-Project Manager, Tirol Kliniken

START TODAY

Start sharing medical data the right way

Who can use it?

For Hospitals, Medical Facilities:

- Data leaves the hospital or organization only anonymized and controlled
- Conduct innovative projects, research grants and cooperate with other partners
- Free yourself from sending CDs and USB sticks

For Research Institutes and Universities:

- Secondary use of data - reuse anonymized data for next research without organizational effort
- Easily share anonymized data with other project partners in grant projects
- Prepare your data for further analysis

For Data Protection Officers and Administrators:

- Fulfill data subject requests while keeping the privacy of others
- Quickly prepare data for third party requests (e.g. police, insurance)
- Meet the demands of data privacy regulations

Key benefits

Create trust by setting a secure standard of data sharing.

Minimize the risk of high fines and other financial penalties.

Save time by immediately sharing data in secure manner.

Make compliance easy with GDPR and HIPAA regulations.

Save money of manual anonymization by automating the processes.
