Copilot for Microsoft 365 Readiness Assessment

Activating Copilot

As of January 2024, Microsoft 365 Copilot is available to New Zealand organizations. There are no minimum seat requirements; the annual upfront agreement is approximately $600 per user, per year.

Is your environment ready for Copilot?

Excellent data governance is fundamental for successful Copilot adoption. We help your organisation develop a robust governance plan with a clear set of standards that protects your corporate data, empowers your users and and helps you to achieve maximum value from Microsoft 365 Copilot.

Getting started

- If you currently manage a Microsoft 365 tenant, our Copilot readiness assessment is your proactive first step.

- We examine prerequisites for Copilot, including access control, data governance, and endpoint management and protection.

- You'll receive a detailed report outlining our findings and recommendations.

- The next step is to facilitate two workshops with key stakeholders to formulate a readiness plan and governance principles.

- As a result, you'll have an agreed-upon training plan, alongside assessment of your licensing needs.

What we assess

This assessment will encompass an audit of critical aspects within your Microsoft 365 ecosystem.

- Data loss prevention
- Data classification
- Sensitivity labels
- Identity management
- Microsoft Defender for Business
- Data protection on mobile devices (MDM) and applications (MAM)
- Teams and SharePoint access review
- Microsoft 365 platform governance

Fixed price: $19,500+GST
