

Envision smart production operations in manufacturing

Our experts are here to help you solve key challenges such as:

- Build a resilient supply chain
- Connecting operations for better outcomes
- Activate digital selling
- Managing financial risk and reducing fraud
- Building agile business processes
- Extending digital commerce models to support new channels

Optimize manufacturing operations for better outcomes

As manufacturing raw material costs increase, companies consolidate and global competition increases, the pressure on senior executives intensifies to ensure profitability. Poor visibility and control over production costs, risk, and performance can severely damage profitability. Organizations need to deliver maximum value and quality to the customer, increase productivity, decrease waste, and empower employees to work smarter.

In this new reality, how do you envision the future state of your organization? Build your transformation strategy with Microsoft Catalyst, a proven and powerful approach to innovation.

Let's ideate together

As part of Catalyst, meet with our experts and run an envisioning workshop, where we can ideate together using design led thinking concepts and jointly define how to enable the digital transformation of your organization.

This one-day briefing starts with a review of your business objectives, followed by mutual discovery and visualization of solutions, ending with a clear, actionable picture of how we can help you reach your business goals.

How Thinkmax can help

Thinkmax can assist in digitalizing the production supply chain through optimized manufacturing operations, digital collaboration and connected operations for better outcomes. Thinkmax has been engaged in the manufacturing industry for the past 10 years and our team of specialists is here to help.

What is Microsoft Catalyst?

Build, plan, and execute business transformation strategies with a proven, innovative approach from Microsoft Catalyst—an envisioning and planning program that employs Microsoft Dynamics 365, the Microsoft Power Platform, and the Microsoft Cloud. Your business transformation starts with an I.D.E.A.

Start by finding the transformation strategy that's right for you. Define and prioritize your strategy using development activities, then foster ideation and drive decision making with an envisioning workshop.

Inspire

Imagine a future state solution for your business

Design

Discover what's possible by aligning technology investments to business goals

Empower

Empower others in your organization to see the value

Achieve

Achieve business outcomes and improved customer experiences

➤ Envisioning Workshop

➤ Business Value & Solution Assessment

➤ Solution Demonstration

➤ Transformation Plan
