

Microsoft Dynamics 365 for Construction

Key Benefits

UNIFIED SOLUTION

for both Financial and Project Reporting
Microsoft Dynamics 365 provides a single chart of accounts that serves the need for both project accounting and general accounting.

INCREASED MARGINS

Microsoft Dynamics 365 gives you the ability to closely manage and control all project-related costs, and reduce costly errors with contract controls resulting in less compliance risk and auditing efforts

DECREASED OVERHEAD COSTS

Microsoft Dynamics 365 provides a single chart of accounts that serves the need for both project accounting and general accounting.

REAL TIME VISIBILITY

Better insight into project budgets, forecasts and actuals including labor, material, equipment and other costs associated to a project resulting in better collaboration across project stakeholders, subcontractors and customers.

Business Pressures in the Construction Industry

9%

Expected increase in material costs in 2020

41%

Of construction companies have diversified into another sector

78%

of construction firms report having a hard time finding hourly craft positions

\$1.24B

invested in "PropTech" firms and offsite construction companies

Thinkmax and Microsoft Dynamics 365 can help companies maximize the productivity, profitability, and ensure a steady cash flow from construction projects while managing change and controlling the risk.

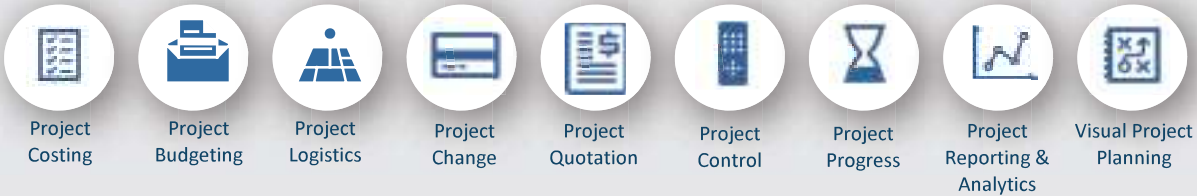

As projects and contracts become more complex, construction companies consolidate, and global competition increases, the pressure on senior executives intensifies to ensure project profitability.

Thinkmax and Microsoft Dynamics 365 for the Construction Industry

Thinkmax have created an implementation accelerator called ConstructionREADY which consists of pre-configuration and embedded best practices for the construction industry. Microsoft Dynamics 365 will provide a solid foundation for growth and scalability for any construction company, and coupled with Thinkmax' industry experience and proven methodology, your business will be able to achieve optimized results quicker and more effectively.

Why Thinkmax?

- Proven track record with significant Microsoft Dynamics 365 F&O projects in construction
- 20% of Thinkmax' projects are "rescues" where they have recovered failing implementations led by other firms.
- 100% client satisfaction for all implementation projects
