

CITRIX ON AZURE Readiness Assessment

Are you ready to take advantage of Microsoft Azure for Citrix workloads?

Our Citrix on Azure Readiness Assessment will uncover the necessary requirements, provide guidelines for the transformation ahead and get you there quicker. Delivered as a three-day virtual workshop, our Citrix on Azure Readiness Assessment will evaluate your existing Citrix digital workspace strategy and will include:

- ▶ A strategic discovery around digital workspace justification including current and future use cases
- ▶ An expert-led review of your existing deployment approach, workloads, licensing models, and existing cloud integrations
- ▶ An exploration of benefits and detriments as well as common approaches of deploying Citrix on Azure
- ▶ Development of a high-level summary report including findings, readiness grade, cost estimates, and where to get started

Based on our industry-leading expertise with Citrix and Microsoft Azure, the Citrix on Azure Readiness Assessment studies both strategic and technical requirements and marries these to well-defined, industry accepted, and best-practice led Citrix on Azure use cases.

During the workshop, we clearly define how prepared your organization is for Citrix on Azure adoption, articulate the ideal use cases to support transformation, and provide clear expectations around costs, technical requirements and importantly, what should and should not be transitioned.

Your business will gain valuable insight into the benefits of Citrix on Azure and a broader understanding of how to strategically bolster digital workspace delivery efforts across new and innovative use cases to increase employee engagement and experience. At the conclusion, your business will be equipped with clear guidance on how to realize your goals.

- ▶ Identifies capabilities for expedited digital workspace strategy and delivery across hybrid environments
- ▶ Discovers existing, new and innovative use cases to increase employee engagement
- ▶ Outlines preliminary requirements, integration approaches, as well as transition and consumption costs

At Third Octet, we believe successful businesses are built on happy, engaged, and collaborative employees – employees who are able to focus on high-value and deeply meaningful work. Our solutions focus on removing physical place and technology as a barrier to productivity and engagement, allowing employees to work when, where, and however they choose, minimizing “time to productive”, and allowing for a personalized definition of their own work-life balance. This is how we better the world through technology.

As a Citrix Platinum Specialist and Microsoft Gold Cloud Platform partner, we are uniquely suited to aid in all of your Digital Workspace transformation efforts.

DAY 1

- Engagement with IT stakeholders for strategic discovery around current and future justifications supporting digital workspaces and cloud adoption direction
- Group briefing of Citrix technology portfolio focusing on Digital Workspaces, Citrix Cloud, and Microsoft relationship
- Technical deep dive of existing Citrix technologies and user experience efforts

DAY 2

- Understand current Microsoft Azure including subscriptions, interconnectivity, existing resources, and supported use case transitions
- Discovery of Citrix licensing and Microsoft Azure entitlements and capabilities
- Gap and cost analysis
- Development of readiness report

DAY 3

- Presentation of Citrix on Azure Readiness Report including roadmap and next steps
