

Data sheet

Understand your organisation's Microsoft Security Health

- Do you know how many phishing attacks your organisation has received?
- Is personal data being exposed?
- Is your organisation's cloud environment as secure as you think it is?
- Identify current and real threats with a Microsoft security assessment.

The Microsoft security assessment will provide a view of your overall Microsoft security posture. This will provide insights into current threats in identity, email, cloud applications and data. It will also provide actionable next steps to mitigate potential attacks and improve your overall Microsoft security landscape.

- Identify current, ongoing risks to your cloud environment
- Walk away with actionable next steps
- Better understand how to accelerate your security journey using the latest tools
- Review your conformity to required security standards and frameworks which impact your organisation.

Current Microsoft Security Health

- Increased Microsoft security health understanding
- Microsoft security assessment will evaluate overall Microsoft security and provide health reports

Understand potential risks

- Identify current and on-going security risks
- Risks will be identified and prioritised

Actionable next steps

- Prioritise next actionable steps to mitigate risks
- Detailed descriptions of required next steps
