

HighQ for Law Firms

Transform the way you work with a secure, cloud-based solution that streamlines processes, boosts productivity, and enhances client service

Thomson Reuters HighQ empowers legal professionals to optimize processes, showcase their expertise, and provide a superior client experience while navigating the dynamic legal landscape. HighQ enhances productivity and collaboration, simplifying legal processes through scalable and tailored solutions. This unified experience empowers legal professionals to drive business forward, connect with other tools, and access trusted information and guidance when needed.

Streamline Processes & Enhance Productivity

Powerful automation tools and optimized workflows eliminate tasks, allowing teams to focus on strategic priorities.

Deliver an Optimal Client Experience

A centralized platform offers secure document sharing, collaborative workspaces, and client portals, creating a cohesive and efficient environment for transparent communication.

Support Your Experts

Robust document management features help you gain complete visibility across matters while controlling access to documents and data, embedding best practices and reducing errors.

71%

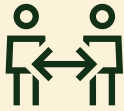

of HighQ users experience an **improvement in efficiency** when addressing client inquiries and requests for status updates.

89%

of clients said HighQ has improved collaboration and communication with their clients.

The **top 3 HighQ benefits** cited by customers are 1) improved client experience/retention, 2) time savings, and 3) improved consistency/quality of work output.

How HighQ enables law firms to provide a superior client experience and stay competitive

Client Collaboration

Deliver state-of-the-art digital client experiences, secure virtual data rooms, and personalize client portals, from initial touch points to service delivery.

Transaction Management

Close deals faster with confidence by automating and managing your transactional work from setup and planning to due diligence, closing, and beyond.

Litigation Management

Provide transparency, responsiveness, and peace of mind during the litigation process.

Digital Vaults & Wills

Maximize efficiency by automating the production of will documents and provide a superior client experience with secure digital vaults.

Document Automation

Automate and simplify the generation of documents to save time, effectively capture your firm's legal expertise, and ensure consistency and compliance with firm standards and industry best practices.

Fund Formation

Streamline the complex investor onboarding process from opportunity to close, while managing risks to capture investor information required for regulatory compliance.

Innovative features, out of the box

- Enterprise-grade security**
 It's built for the enterprise, independently tested, and ISO 27001 certified, so you have the high-grade security and control you need for your sensitive data.
- Private cloud**
 We host the platform in our own private cloud in 14 data centers around the world. You decide where to store your data, and it stays there.
- Powerful APIs and integration**
 Take advantage of mature APIs, native integrations, and apps with best-in-class solutions for AI, productivity applications, services, and more.

“We found a solution that works in all major use cases and is ready for more.”
