

Thumba Helps Agile Teams Shift Left & Ship Faster

Requirements are the first line of quality
Are yours holding up?

38%

Projects fail due to poor requirement quality - *Project Management Institute, PMI*

40%

Reduction in preventive maintenance by using GenAI enabled workflows - *Boston Consulting Group (BCG)*

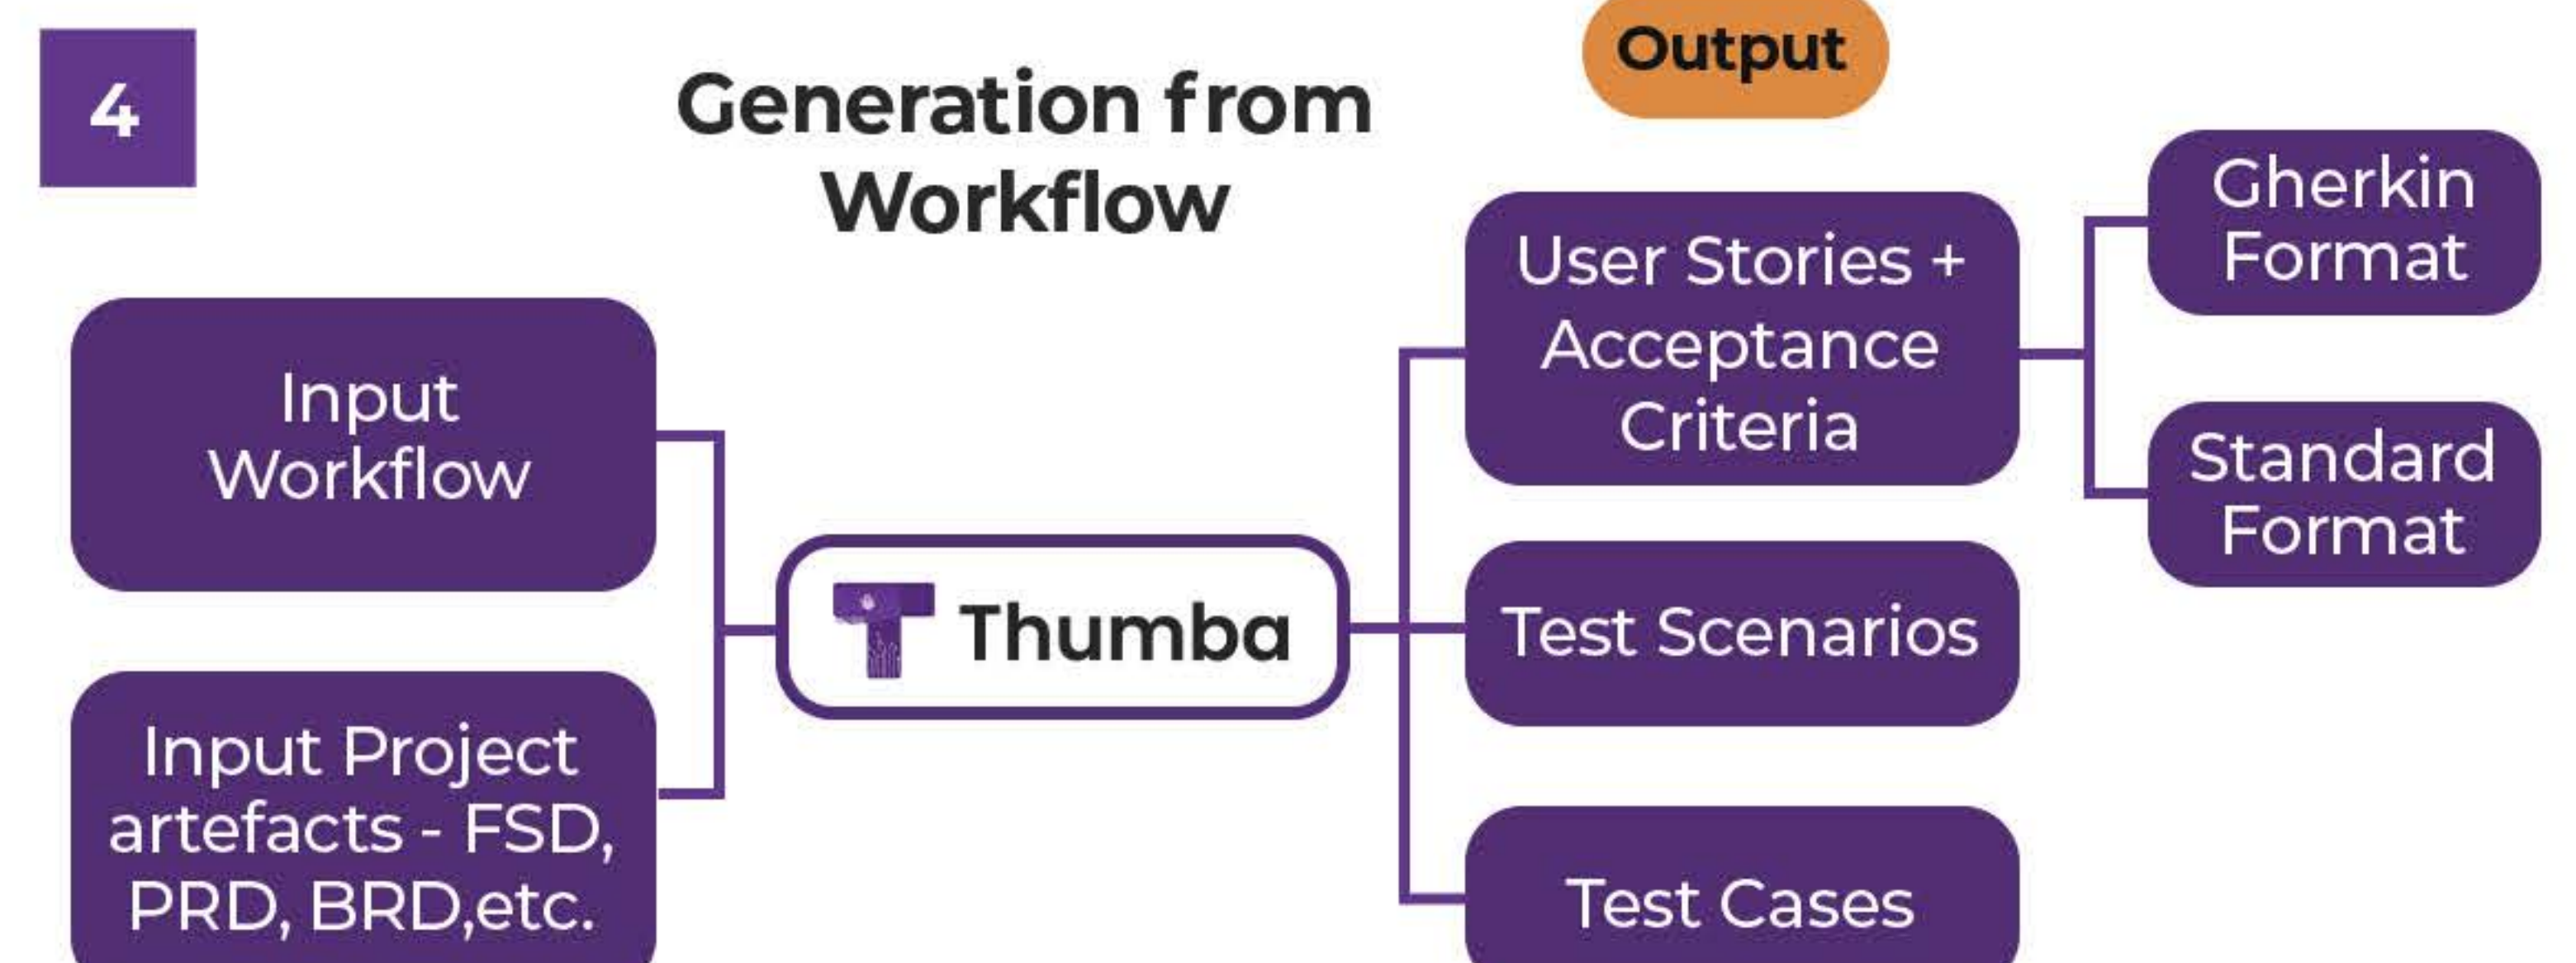

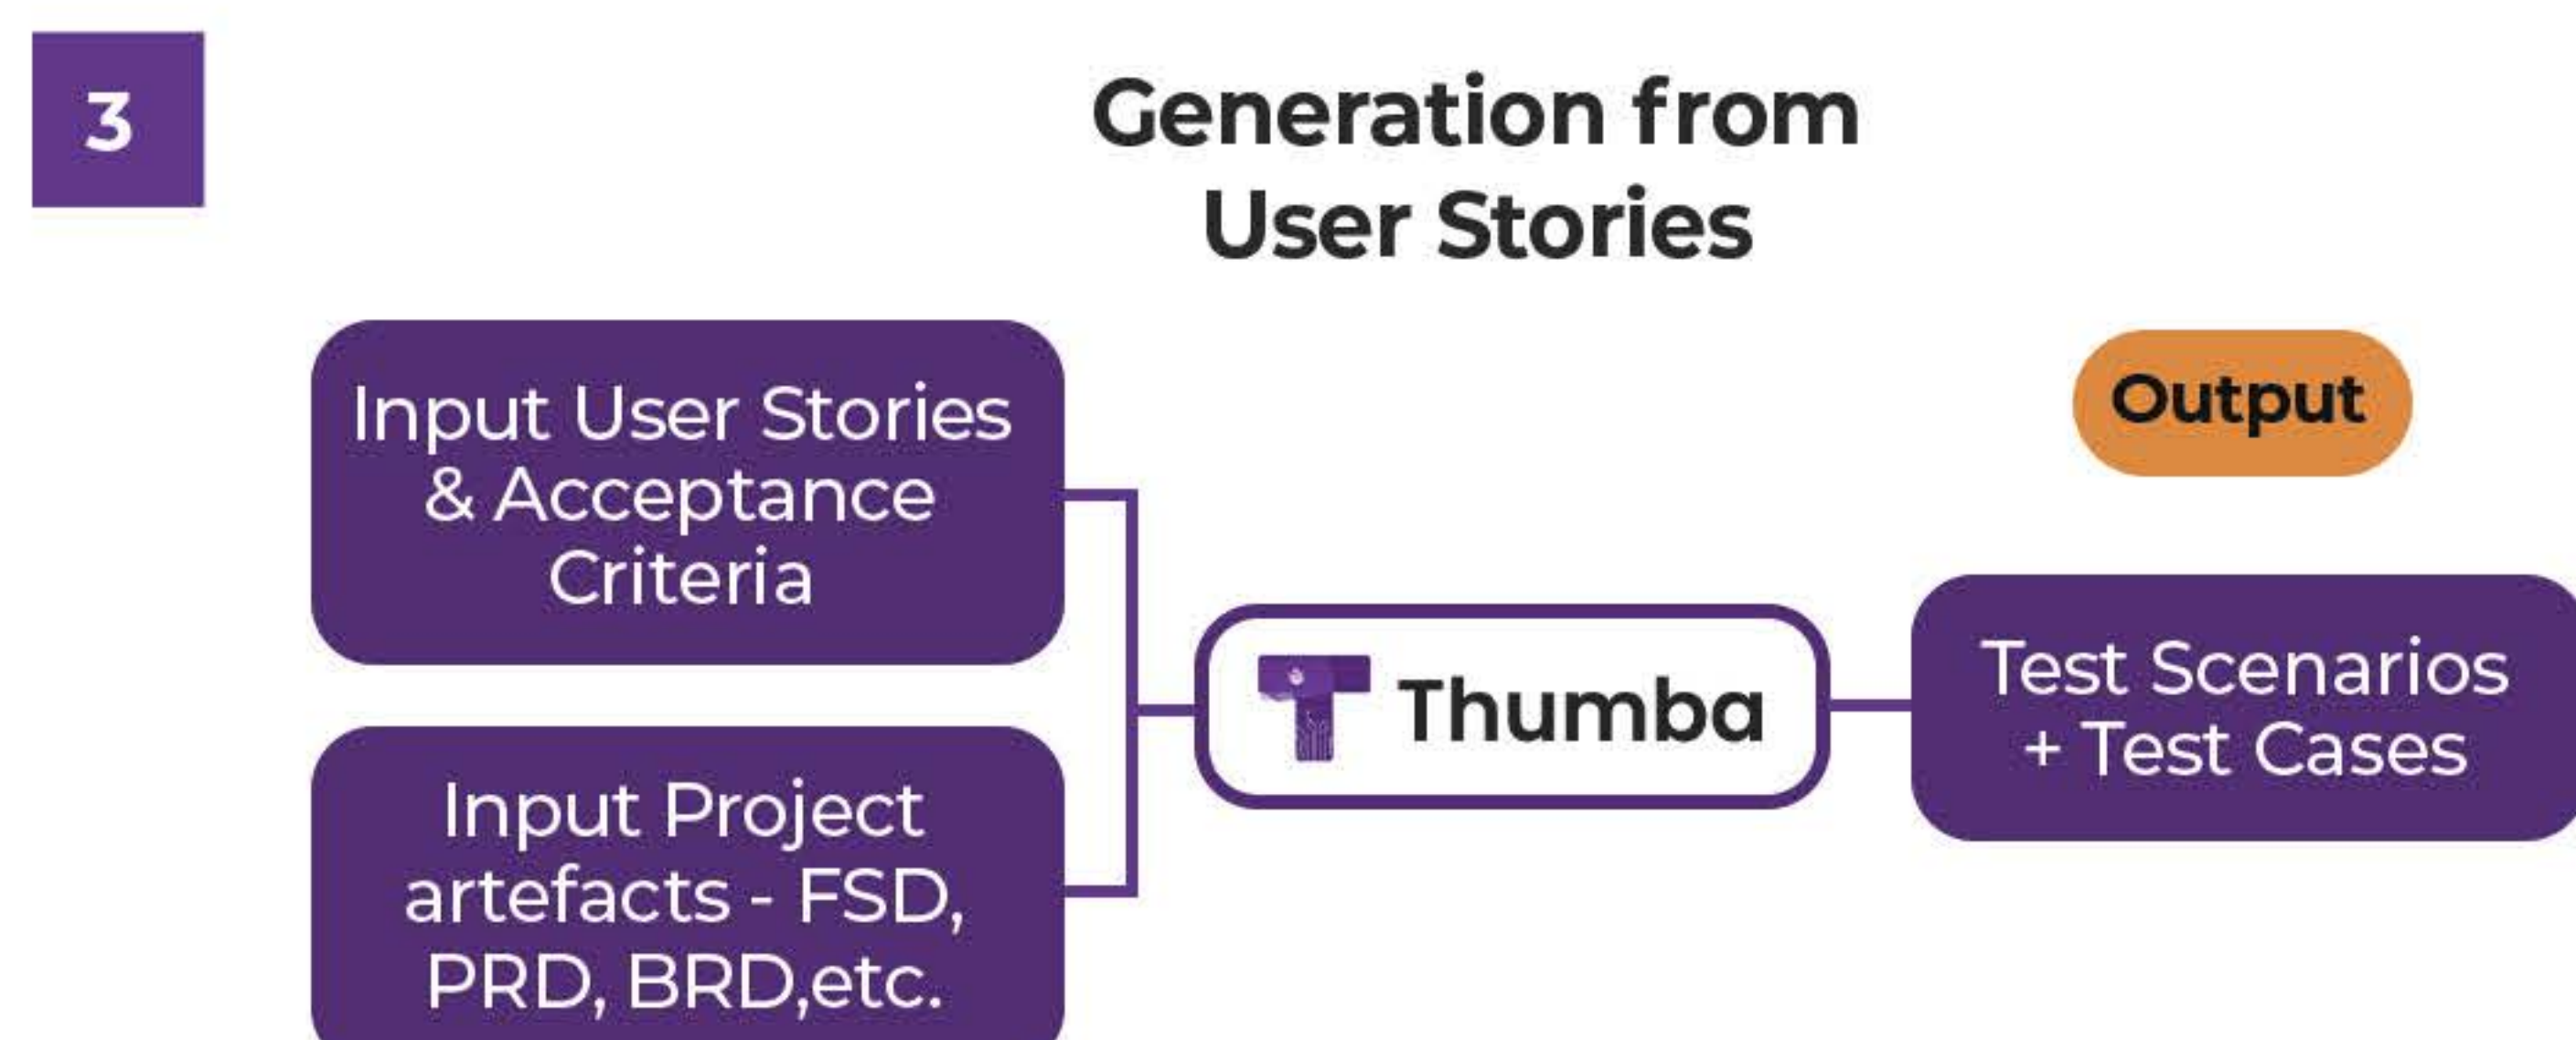

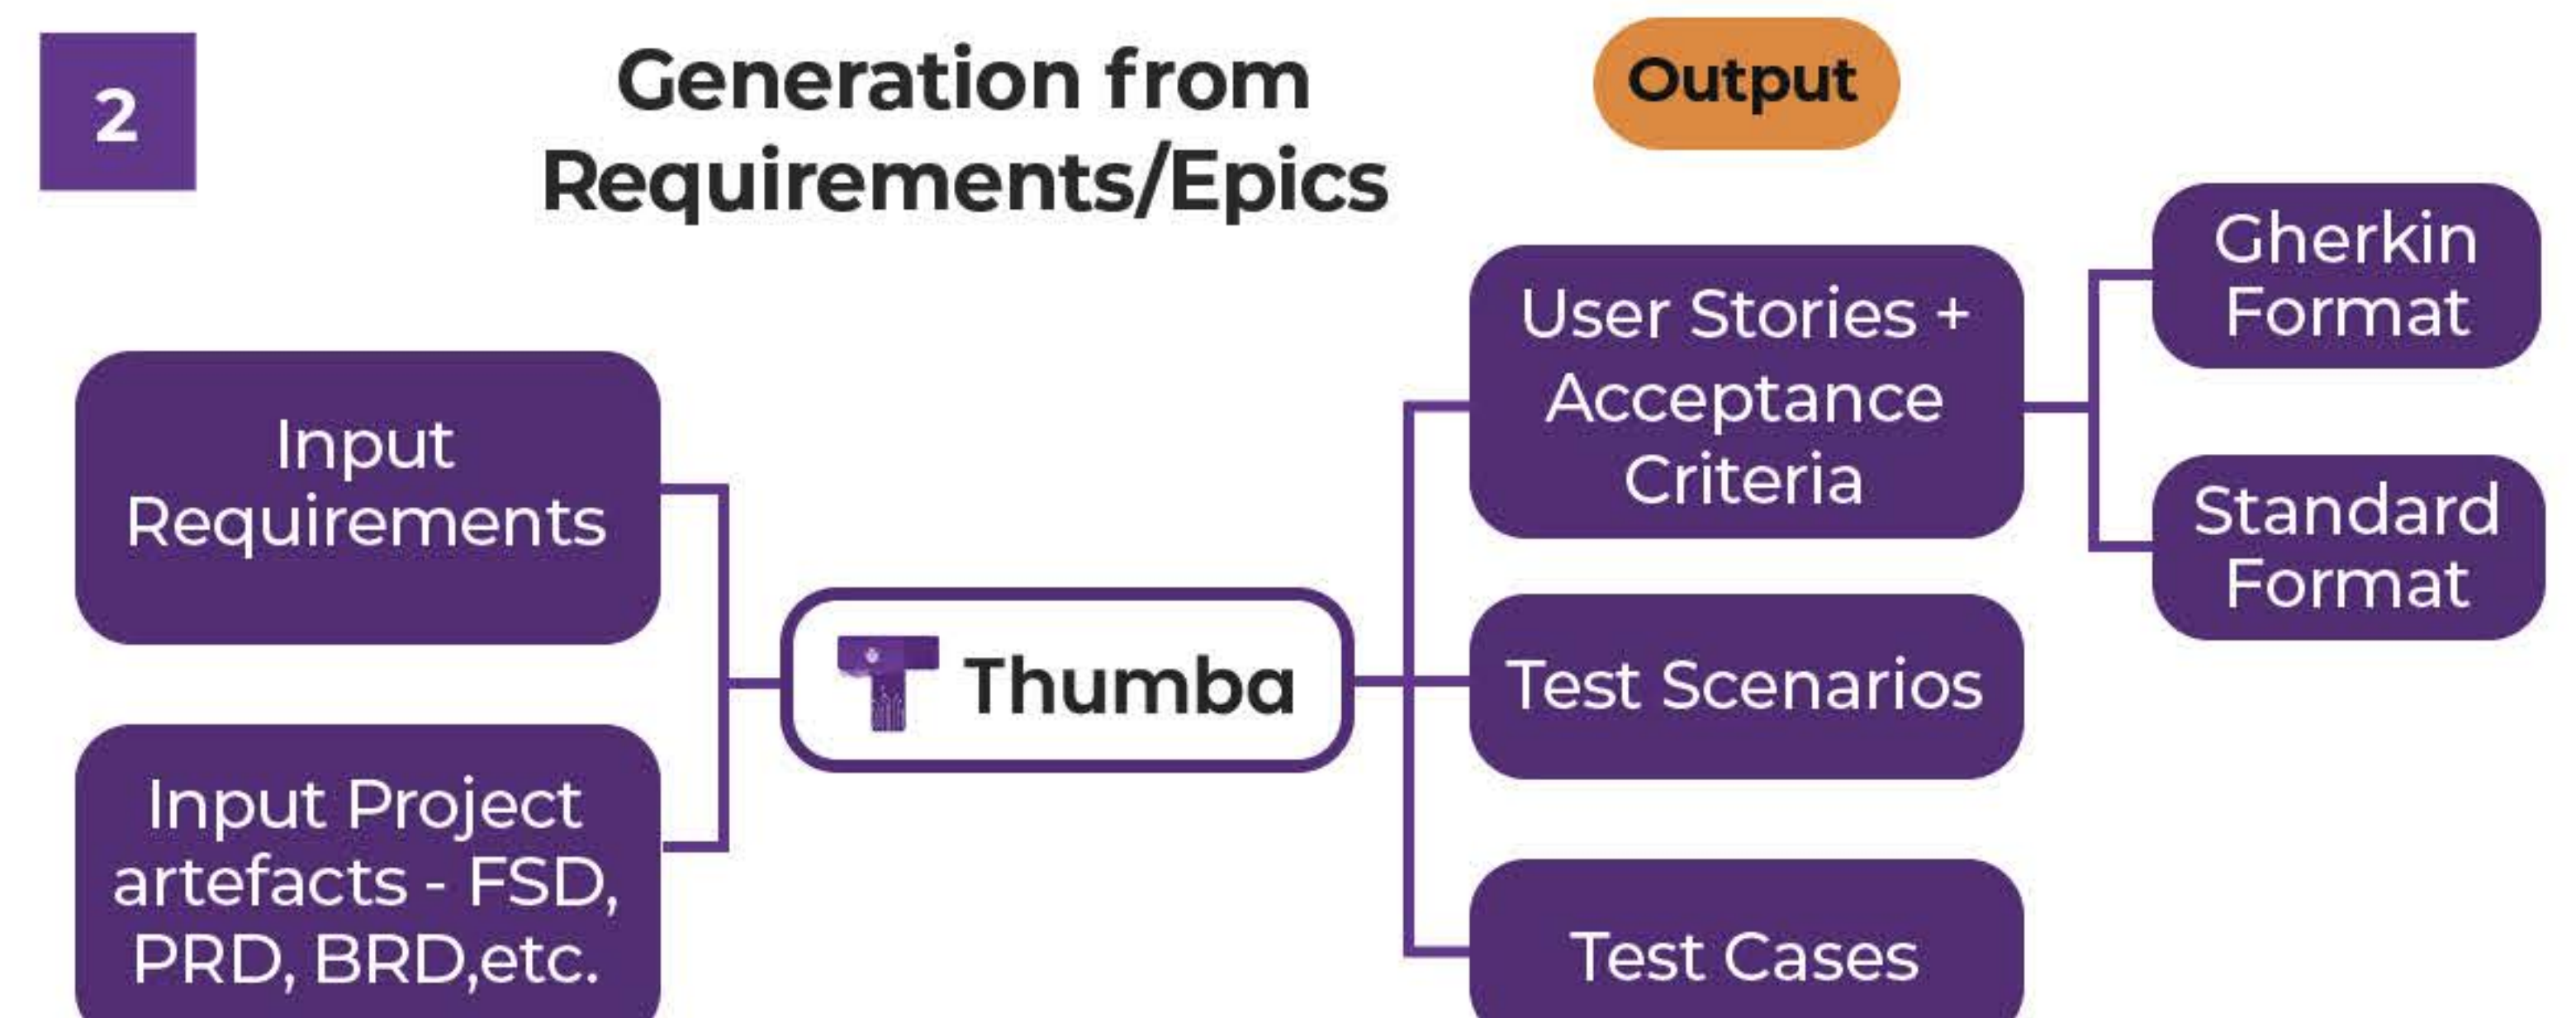

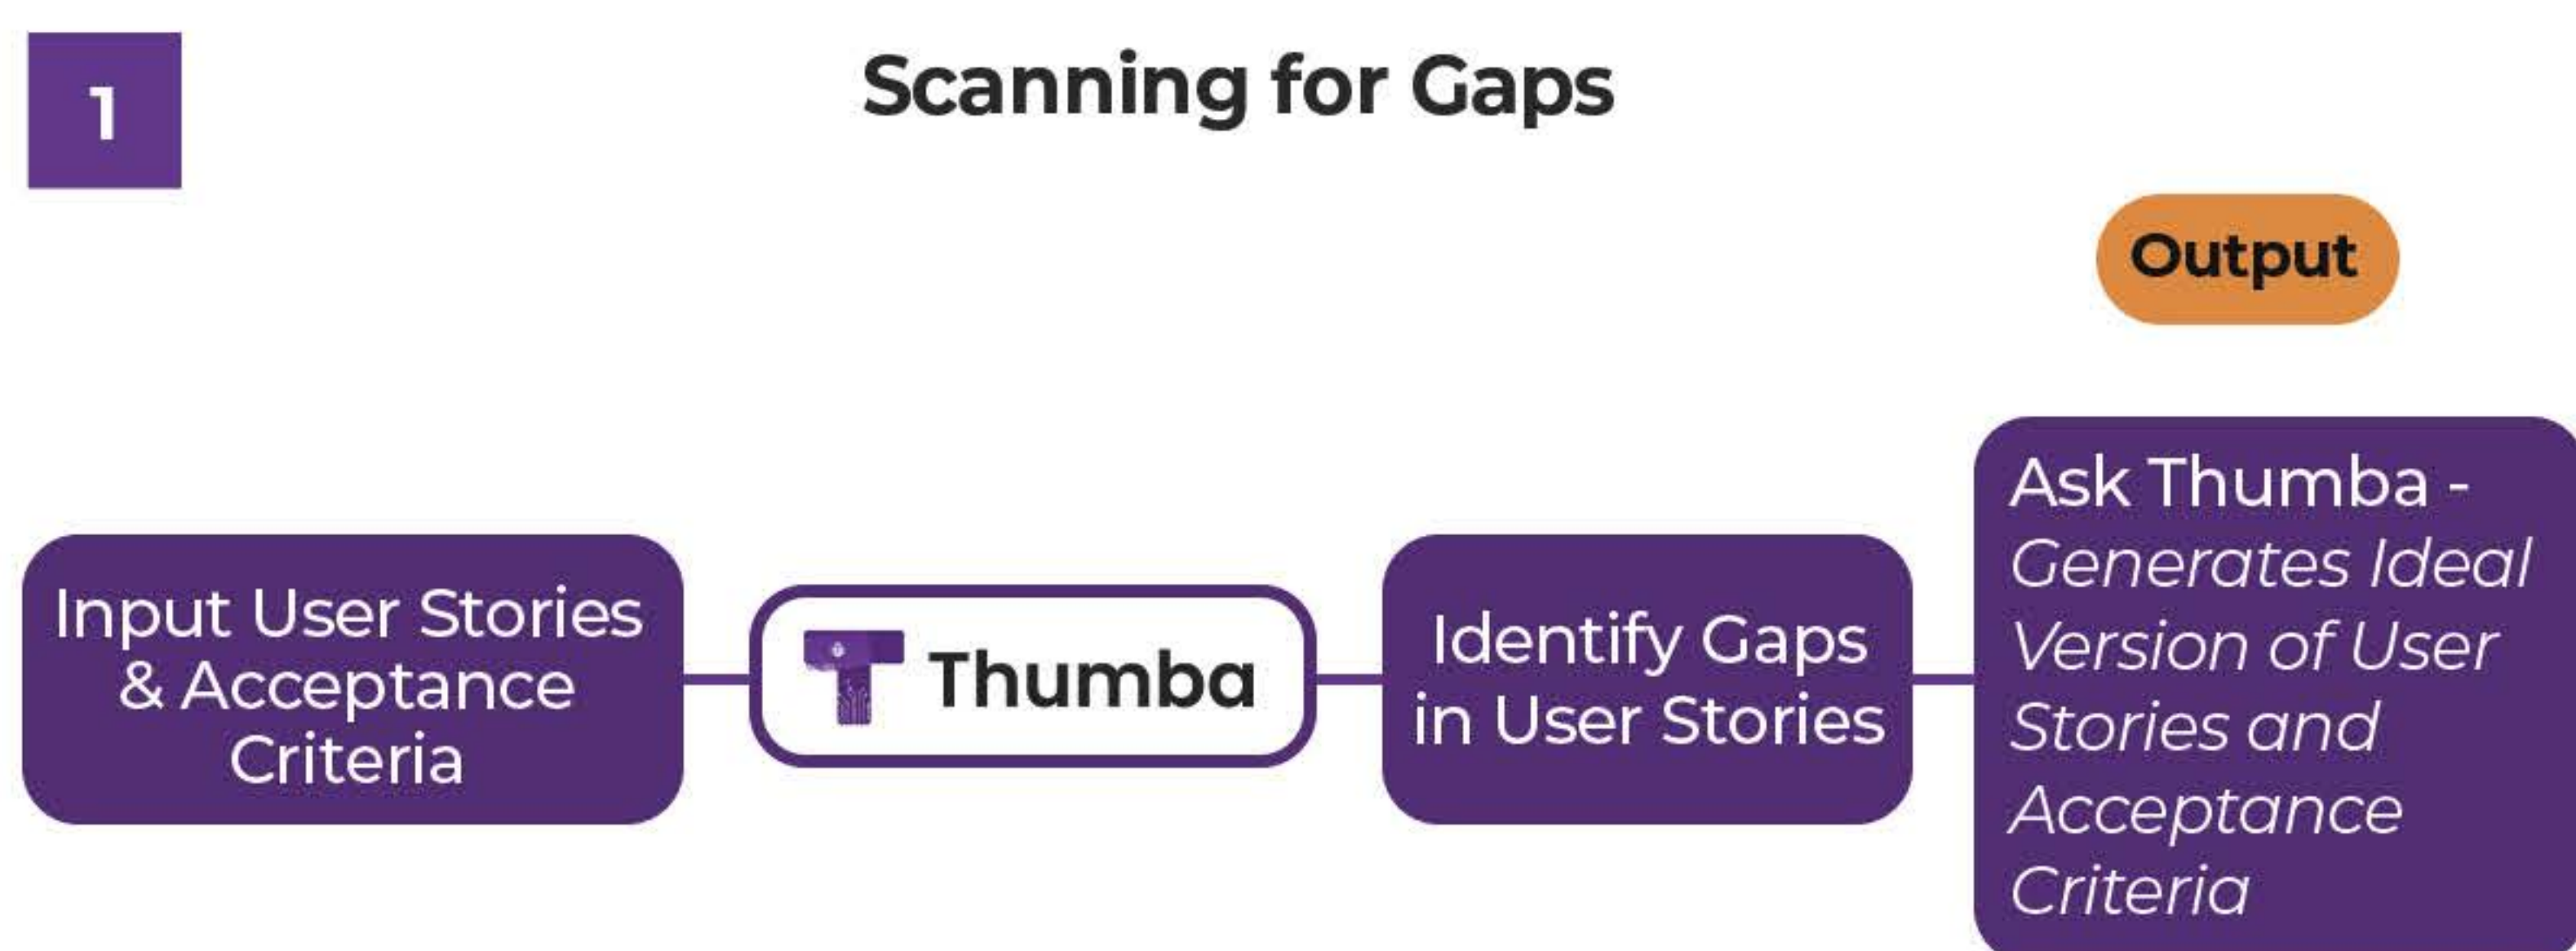

\$1.52 trillion

Cost of poor software quality, due to technical debt - *blackduck.com*

About Thumba

Thumba.ai is a SAAS based advanced generative AI platform purpose-built to accelerate agile software delivery and transform business process automation. Founded in 2023 and headquartered in London, Thumba is every agile teams sidekick.

Unlike generic AI tools, Thumba specializes in transforming plain business requirements and workflow artifacts into fully structured user stories, test scenarios and test cases - within seconds.

Works seamlessly with

Key Business Benefits

Reduce time-to market

De-risk your project from failure

Bridges the gaps between business and IT

Optimise your IT costs

Prevent loss of brand value

Voice of the Customer

Thumba revealed ambiguity in 90% of our user stories, of which, 23% were duplicates and 31% of user stories were contradicting. This information helped us optimise our code base and eliminate redundancy. It continues to provide us valuable insights which help us reduce rework and technical debt.

ERP Director, UK

Thumba impressed me with its ability to turn requirements into clear, comprehensive user stories using multiple intelligent approaches. Its test case generation is equally strong, capturing the right scenarios for robust validation. Overall, Thumba elevates traceability, quality and delivery confidence across

Test Automation Head, India
