Experience seamless communication with patients through Email and SMS to enhance patient satisfaction and engagement.

Keep track of vital patient information with important medical and contact information available at the click of a button.

Integrate with useful apps.

Delightfully Simple

Hear why our customers love TidyClinic

TOMS are impressed with the excellent quality technology, that takes out the complexities and distractions, helping clinicians to focus on the patient and get the job done efficiently. Good software allows for quicker consultations, making everything “just rapid.” They described the system as a “well ordered filing cabinet” with information found at just the touch of a button.
