Data Security Assessment Engagement

TIERPOINT

Uncover the Hidden Data Risks Putting Your Business at Risk

Partner-Led Engagement Highlights

- Uncover where sensitive and stale data lives across your Microsoft 365 environment

- Identify insider risks and data behaviors that may threaten your business

- Measure how your data security posture stacks up against compliance standards

- Get a detailed risk report with insights tailored to your environment

- Walk away with clear, actionable next steps to improve protection and compliance

The rise of generative AI means your data is growing faster—and becoming harder to govern. You need a strategy that helps you spot and stop risks in real time.

Your data is growing fast – and so are the risks.

By 2026, the global datasphere is expected to double. Generative AI is accelerating how much data you create, share, and store—often in places you didn't expect. That makes your business a bigger target for data loss, leaks, and insider threats. But here's the challenge: **30% of decision-makers don't know where their sensitive data lives or how it's being used.** If you don't have visibility, you can't protect it.

Now is the time to take control.
Don't wait for a breach to expose the gaps. With the right visibility and tools, you can secure your digital estate—before it's too late.

Protect trust. Safeguard privacy. Reduce risk.
The Data Security Engagement helps you detect and act on threats to your data—so you can protect your people, customers, and business.

Why you should attend

Gain visibility into your data security risks, uncover hidden threats, and walk away with a clear, actionable plan to strengthen protection, improve compliance, and reduce exposure—powered by Microsoft Purview and guided by TierPoint experts.

Define your data security goals and build a strategy to protect **what matters most— your business, your people, and your data.**	Learn how to **detect, investigate, and respond to data security** and privacy risks—before they become business-impacting events.	Discover how to fast-track your compliance journey **using the latest tools from Microsoft Purview**—built for today's evolving regulatory landscape.	Walk away with **clear, tailored next steps aligned to your unique goals, risks, and compliance priorities.**

What to expect:

By the end of this engagement, experts in Microsoft compliance will provide you with a:

- ✓ **A detailed Security Check Report** with insights from automated risk discovery in your Microsoft 365 environment

- ✓ **Tailored recommendations and next steps** to help you reduce exposure and strengthen compliance

- ✓ **Visibility into Microsoft's data security approach,** including how to manage insider risks with Purview

- ✓ **(Optional) Compliance Manager Tenant Assessment Report** with prioritized improvement actions

- ✓ **Strategic and tactical guidance** to support your long-term data protection and compliance goals

---

The **Data Security Check uses Microsoft Purview** tools to surface the threats you can't see—before they turn into costly breaches or compliance failures.

You'll gain visibility into:

- **Sensitive or stale data** stored in risky or unmanaged locations
- **Insider threats and risky behaviors** that put data at risk
- **Data loss, leakage, and unauthorized access** across Microsoft 365
- **Compliance gaps** that could leave you exposed in audits or investigations

It's not just about finding the risks—it's about knowing what to do next. You will get the insight and direction to take immediate action and build a stronger data protection strategy.

Why TierPoint?

You need a partner that not only knows the tools – but knows your challenges.

As a Microsoft Solutions Partner with deep expertise in both cloud and cybersecurity, TierPoint helps mid-market organizations take a practical, phased approach to reducing risk.

Bringing the people, processes, and platform knowledge needed to deliver outcomes – not just technology. From initial discovery to action-ready security roadmaps, you'll be covered.
